Thread: [\[AUTOBUY\] \[VOUCHED\] Start your own bitcoins VCC shop and make \\$\\$ without investment!](#)

RianWorks - December 20, 2015, 2:54 am

Hello HF members!

Did you ever wonder how those VCC sellers make the cards?
Did you ever want to start your own VCC selling business?

Today i wrote a VERY DETAILED e-book WITH PICTURES that will take you by the hand and show every step to start your own VCC shop without ANY investment!

You WILL earn money with minimum efforts selling VCC cards. With my system it takes only takes a few minutes to make a VCC for your customers.

You can start selling VCC's on various forums today!

FAQ:

Can my customers use the VCC worldwide? Yes they can. Worldwide without any restrictions.

Can my customers give fake details for the VCC? Yes they can

Will the VCC work to make purchases on Amazon or webshops using Paypal? Yes, the VCC's you sell will work like any other normal credit card.

Can my customers reload the VCC? Yes they can. You can reload it for them and make more money.

How much money will i make? If you sell 5 VCC's / day you make a minimum of \$20 (the price of this e-book). You will also make money on every reload.

Do i need to invest? No! You can make your first VCC when you sold it. If you want to make VCC's before you sell them you need to invest but that's not the way i do it. I invested 0 (ZERO) to start.

What currency VCC's will i be able to make? You will be able to make USD, EURO and BRITISH POUND STERLING cards.

Do i need to do any ID verification? No you don't, you can make as many VCC's as you want without verifying anything with a limit up to \$2,500 USD WITHOUT VERIFICATION!

It's not, he probably shows you how to sell them offsite.

It's also a scam, I've been waiting over a month now for delivery.

AngelinaOwens - January 26, 2019, 11:00 am

Is there anyway of me sending thru Paypal?

babyreign - January 31, 2019, 5:52 am

good i hope i understand this

There is no method. The seller is scamming. I've been waiting several weeks and the seller has ignored 5+ PMs.

Quite literally the ONLY response I got: (I used WP image CDN to cache the proof)

The BTC address is: 15ySUx1dxa1XLGVjFaLdNvT6ruRVjdiaSj

As you can plainly see, the scammer forwarded my money elsewhere later that day:
