Thread: [What photo editing program do you use?](#)

UniQ - December 20, 2015, 8:34 am

Very curious.

I used to edit my pictures on Adobe PS CS4 but that was quite a while ago.

So, what photoshop program do you use?

Do you pay for it? I don't see how everyone has photoshop.

I use Paint.net, ugh.

-DroizzHmm, can you give me an insight onto how people get it for free?

Caffrey - December 20, 2015, 10:18 am

I dont think anyone does really, unless you are professional and buying it for a company, for people like us though, i don't see any reason to buy it, we just use it to make some things, the people that should pay are the ones doing logos for proper companies and all that, and I use Photoshop CC!

There's always GIMP. Sometimes I switch to GIMP just for the change of UI.

Fariko - December 22, 2015, 8:34 am

Paint and GIMP because I'm a broke boy.

Photoshop CC 2015 Torrented. I use Norton AntiVirus so I'm good.

Sebiix3 - January 5, 2016, 10:00 am

If you just like some simple effects and edits, use Photoscape. Its very simple and easy there, no effort and it looks pretty too :)

Gladly - January 5, 2016, 5:57 pm

I'm using PS CC 2014. Adobe CC Suite subscriptions are pretty cheap if you're looking to upgrade OP, the new versions of Photoshop are a huge improvement, I used to use CS4 too.
