Thread: [Prism | Official group coming soon | Group graphics](#)

**Remix** - December 21, 2015, 12:44 pm

We need graphics for our new group Prism

What has to be made:

Userbar

Logo

Divider

Forum icon

The winner will get \$125

The group will be about programming and focuses on more advanced topics.

Sizes:

Userbar: 136x42 px

Forum icon: 40x40 px

May the dopest graphic will win.

Btw please don't send the submissions via PM it's annoying to share it between the group members

**Russ.** - December 21, 2015, 12:44 pm

Thank you Remix, May the Dopest Graphic win.

**Computer Craft** - December 21, 2015, 12:45 pm

Can't wait to see some of the submissions.

Hi there,

This is my design and I would like to briefly introduce it to you:

[s17.postimg.org/5709gptm5/LOGO2.png](http://s17.postimg.org/5709gptm5/LOGO2.png)

I can't post links, videos, or images until I've made more than 50 total posts or have upgraded, sorry for the inconvenience

About the color, I chose green because it represents computer, cuz green and black are colors which represents "computer". You may ask why I didn't use black, that's because I am not sure if your website will use black as the background :P

About the text, I used "[", "]" and ";" because you said that the website is for advanced computer topics, so I guess using programming codes will make it better.

Hope you will like my design!

Cheers,  
Gabriel

I think inline userbars look the best. By this I mean centered both vertically and horizontally. Yours is positioned at the top with lines coming down. Looks weird.

Hmm, what do you suggest I do? It is a prism afterall, so there is only so many places the light can shine and hit nicely. Unless I scrap the concept.

That's looking more like polymath, I like it.

well I could really use the \$120 looks like a lot for a logo I'm surprised no one outsourced this to fiverr :P or maybe they did

Gj everyone though really cool userbars

What if you had these as a gif and it kept changing colour? Don't know if Omni allows gifs but just a thought. By changing colour I mean continues to fade into other colours and not just jump to a new one.

Omniscient used to allow gifs in userbar, I don't know if he does anymore.

This one is my favorite by far.

If we don't get any more submissions this looks like it is probably going to win.

Sometimes it doesn't even help to make it animated anyways. Like Hue adjustments, maybe small light sweeps.

[img]http://4.1m.yt/bwUNqaH.png[/img]

Added some more repetitions: <http://4.1m.yt/bwUNqaH.png>

Need to make it less center-focused I guess.

Looks nice

Could you post just the userbar in the normal size to see how it will look?

And could you make a version with white or light grey colors? I guess it would look nice too
