Making money with Bitcoins

How I make at least \$20 a day!

Hey there guys and gals! This will be my first guide on how to make some really simple money with Bitcoins. Please, don't expect that this will make you rich, because it simply won't... But this is perfect for earning a quick buck or two every few minutes... It doesn't take a lot of work either.

Before we go any further I would like to state that I am not responsible if you lose your money in any way... This thread was made for educational purposes and I cannot guarantee anything. But if you follow my advice, you're on a good way of making a nice profit.

What you will need:

A Bitcoin wallet (I recommend Mycelium for smartphones)

Some common sense

Basic math skills

Around \$20 to invest

Step 1:

Before we proceed with this method, you will first need to exchange your currency to Bitcoins. I would recommend LocalBitcoins because that is the safest website you can exchange your currency for Bitcoins. You can easily exchange PayPal for BTC for 5% - 10% rate. But most of the sellers require ID verification, meaning you will have to submit your ID to prove that your PayPal account is really yours. But this is one time only, after that you can keep purchasing without any verification from the seller. The trades are almost instant... Sellers are always online and none of my exchanges took more than 5 minutes to complete. If you don't want to submit your ID, you can also exchange your currency on WirWoX (You will have to pay approx. 30% more than you get) or on Hack Forums. I recommend using a middleman or exchanging with a really trusted exchanger. Make sure he has no deal disputes or unhappy customers. After you have BTC available, proceed to the next step.

Step 2:

Okay, once you have BTC available, it's time to purchase Amazon.com Gift Cards. But before you do that, I would recommend creating a brand new Amazon.com account with fake info, just to be on the safe side of everything. After that, go to the Hack Forums marketplace and find a trusted seller that sells Amazon.com Gift Cards (AGC) at a rate of 65% or below. Any rate higher and you won't

be able to profit from this. After you purchase the GC, head over to your Amazon.com account and add your GC to your balance. After you do that, move on to the next step...

Step 3:

Once your Amazon.com balance is ready, head over to Purse.io (this is not a referral link) and create a new account and login. Once you are logged in to your account, you'll see these two options at the top of your screen.

Click on "EARN" and you'll be taken to the next page. Now, make sure that you filter offers by country and select United States. This will enable you to pay with your Amazon.com balance. After that, find an offer that is profitable and buy the item for the user. Once the shipment arrives and when the system confirms that the shipment has arrived, Bitcoins will be released from Escrow to your wallet.

How to pick a profitable offer:

If for example you bought an AGC worth \$10 for 65% (meaning you've spent \$6.5 worth of BTC for it), you will have to find an offer that pays you more than \$6.5. You do that by clicking on an offer and seeing how much BTC you'll receive for purchasing the item for the user. If it's more than the amount you paid for the AGC, go ahead and make some profit. If not, pick a different offer or wait an hour or two... Offers are being updated constantly.

Step 4:

Rinse and repeat, that is basically it. Really simple... And if you put in some effort daily, you'll start seeing a nice profit.

If you have any questions, feel free to leave a comment and I'll answer it ASAP.

Please refrain from PMing me since I'm busy and probably won't be able to answer all of them, thank you!

Solid post, but there are a lack of AGC sellers on this forum

Thanks for your feedback. To be honest, all you need is one AGC seller that can deliver when you need the funds. I have my personal one here on Hack Forums and he's dealing with others too. But I won't be sharing who he is since if someone gets scammed, I don't want to be held responsible because of linking them to him.

The post could be detailed a little bit more, but I want readers to participate in this thread, therefore, I haven't handed out everything on the plate for them. ?

Who knows any legitimate AGC vendors on HF?

There are plenty out there... Go through the marketplace and scan for people that have sold a lot of AGCs before... Make sure that they have no deal disputes or unhappy customers. You should be good to go.

bebonzy09 - December 22, 2015, 4:24 am

Also, localbitcoins has a BTC>AGC section I believe

Bdhsjabdjajbahjx - December 22, 2015, 5:23 am

Really? I haven't noticed that yet, I will check it out when I get home, thanks!

bebonzy09 - December 22, 2015, 6:36 am

Yeah, I believe you have to have the bitcoin though. So what you can do is buy bitcoin from Coinbase at 1% and then use that to buy AGC there

Okay, I just checked it out and I can confirm that you can purchase AGCs on LocalBitcoins... But... The rates are so bad that you won't be able to make any profit at all. Therefore, I would recommend finding a seller on here or somewhere else.

There are plenty of them in the Hack Forums marketplace, maybe not on the first page all the time but they definitely are.

AGC means Amazon Gift Card. ?

jujuger - December 23, 2015, 2:21 pm

Thanks op, this is a great guide.

W23rdstr - December 23, 2015, 2:39 pm

AGC = Amazon gift card.....

Bdhsjabdjajbahjx - December 26, 2015, 1:47 pm

Guys, thanks for reading my guide and commenting on it. I'm really happy that people actually leave with more knowledge than they had before. ? New guide coming soon! Stay tuned! :smile

If someone on purse wanted me to buy them a giftcard, is it required that I buy it from amazon? Or can i buy it somewhere else and send them the code?

It has to be from Amazon since that's how they track orders and release Bitcoins from Escrow.

Great tutorial. I will try this :)

midou14 - December 27, 2015, 6:12 am

thanks for this thread but don't have money

dash2009 - January 30, 2016, 1:17 pm

hey, thanks for this awesome method.

Can you PM me from who do you buy the gift cards? I have a seller but what if he is selling GC purchased with stolen CC. What will happen if the original owner issues a charge back? Will amazon block the GC and remove funds from my amazon account?

hammad20120 - January 31, 2016, 3:41 am

Thankyou for the tutorial..
I hope i had money to invest.. :/

dash2009 - January 31, 2016, 5:01 am

Can anyone tell me what if my AGC supplier gave me carded GC? What will happen? Will my amazon account get blocked along with money? Will I get in legal trouble?

wass11 - February 1, 2016, 4:21 am

Thanks hope it useful to make some money.

elwaleed00 - February 1, 2016, 1:48 pm

I will try this later on in the week. Although there are no AGC sellers on Hack Forums.

Nice guide bro. Thanks for sharing!

Etho - March 4, 2016, 1:41 pm

I only found AGC on localbitcoins for 95%, it's becoming harder to find cheap AGC

SixtyNine96 - March 5, 2016, 1:03 am

Great post, nice explanation. Thanks for this :)

gxmonitor - March 6, 2016, 1:18 am

Nice method. I will surely try this.

UltimateAlloy - March 7, 2016, 3:38 am

I have to ask, quite often I see someone offering x amount of bitcoins for y costing item from amazon. But their cost never has shipping involved? How do you make sure you keep that in consideration?
