Thread: [HUGE FONT PACK! 2,700 Free and Paid Fonts! Thousands!](#)

Maulish One - December 22, 2015, 10:00 pm

I remember back about a year ago I uploaded a huge font pack. But the link ended up dying out, and I managed to find it again and well, it has thousands of fonts and hundreds of paid fonts.

I feel I'm wanting to give back to the community. Love to see everyone else giving, so I want to pitch as much as possible.

Here's 2,700+ fonts in which a huge amount are paid fonts. Enjoy yourselves, artists!

Proof of the fonts:

OP I truly love you. I've been wanting to find new fonts, just was lazy to go out and do some actual research. But this is seriously going to take some time to install on my machine.

that's a really bad idea, having 2000+ fonts installed at once

Great resource, thanks! I'm looking for a way to separate default fonts from downloaded ones, it's a huge pain sifting through them all just to find a good font.

kairax - January 6, 2016, 11:59 am

Man that's a lot of fonts, thanks for sharing

Gxnge - January 12, 2016, 7:34 am

I hate to sound stupid, (I'm really new to graphics I'm just getting into it) but will these fonts work on all sorts of editing software? E.g can I use these on GIMP and Photoshop?

kbpro - January 13, 2016, 5:42 pm

Thanks OP for the fonts, was looking for a big pack awhile ago but couldnt find it. Got my last one here about 6 years ago :P

@Gxnge, download all the fonts and extract them to a folder. Select them all at once, right click and go install.

Once they are installed they will work on any program that uses windows fonts :)
