BUSTA SCRIPT

(script for bustabit.com)

USE CHRISTMAS CODE: "XMASHF" FOR A DISCOUNT

I am selling a script i made a while back and had quite a bit of success with it.

It's a safe auto script that can still make quite a bit and you can customize how much money you want to put in it, I've doubled-quadrupled my money a few times but then I've been stupid and fucked it all up by going manual which i recommend you do not do.

I am giving away 2 vouch copies to upgraded members or a regular member with 500+ posts and 20+ rep.

I will try to post proof. (Dec 23, 2015 03:24 AM)Carbohydrates Wrote: [\[CITE\]](#)

Works well, spent \$1.80 on this, and posting this vouch, after about an hour of low bit betting I made my money back. This could have been made back in 5-10 minutes if you want to be a bit riskier, but I try and stay safe so it took longer.

\$2~ an hour x 24 = \$48 a day for me. However, there is always risk involved and this could fail me.

But this, for the amount it costs, is worth it. (Dec 23, 2015 05:18 PM)MR.Nitro Wrote: [\[CITE\]](#) Huge vouch to Incapability, he is a legit and trusted member and the script works great. If you are scared about knowing how to set up the script, it is very simple and i created a seperate file to teach you how to set it up! If that does not work, pm me or ReeceC to learn how to set it up!

T.O.S

1. You will not leak/resell the product.
2. You will not claim the script to be not working, yes occasionally you might lose a round or two,

but the script works fine, that's why i don't recommend you put over 10,000 bits in the script as i am not responsible for your loss.

3. You will not sales trash

4. You will not chargeback

Looks like a nice idea. Do you have any proof that you made money with it? Or any proof that the script uses a good logic..

big dick rick - December 22, 2015, 11:39 pm

So what does this script do that makes it better than the auto provided betting system on bustabit?

I gave out vouch copies and hopefully they will post results soon.

I haven't used the script for a long time and have tried to do manual betting for a while and it just did not work out, so once i get some more BTC i'll run the script and post my graph etc.

The script is quite safe although you can lose money but you can also edit it to your liking depending on how safe + how much profit you want per bet and how much you are willing to lose etc. Hopefully the people I've given vouch copies too will post there reviews soon and give feedback about how well the script works!

I'm going to go for a bit but when I come back online i'll be happy to answer any questions regarding the script!

SREE - December 22, 2015, 11:43 pm

you got any video or pictures as proof this works ?

big dick rick - December 22, 2015, 11:45 pm

Is this a tampermonkey script?

problems.x - December 22, 2015, 11:46 pm

No it's a script for the actual bustabit website itself, it includes how to set it up in the SETUP_SCRIPT.txt file.

Vouch for Incapability and his script. For only \$1.80 you can double it automatically!

I will try to post proof.

Thanks for this thread, just discovered bustabit.

I'm pretty sure I can write my own script that will make money 100%, then I plan to bot it over 1000 instances.

Lets see how I do :p
