Thread: [\[Official Group Divine\] Nex+ Account Compromised 2194640](#)

Nex_TEMP - December 23, 2015, 2:29 am

Guys do not make a deal with my account

I did not sell Divine or try to sell leadspots. Also I did not reopen Divine and Debug crypter threads. I dont know who will reFUD and I cant do it myself so theres no way I can open the thread

My computer and all files I had including Galaxy Logger userbase is compromised, I request everyone to change there passwords if they have been on Galaxy Forums which is lately offline luckily.

I was ratted by someone who doesnt know their dick from their asshole so I have removed the rat from my PC.

Also do not deal with my Skype too since that has also been compromised.

If anyone lose their license to anything I will refund them

Divine is NOT going to be Prism. It will remain Divine and be a group of coders and marketers like myself.

I have notified Omni and I will recover my account in a few hours.

I have 2FA enabled but I think they somehow got my private key.

Anyone you have talked with since the last few weeks isnt me, I just hope so he doesnt fuck up my account

Also do not deal with anyone imposing as me or selling cracked Athena build. I will be back soon.

Also, do not open any of my program since they can be backdoored with Netseal updater so please do NOT.

I will sort everything out once I'm back.

Calcyon - December 23, 2015, 2:31 am

PM me when you're back and I can track down the person who did this for you. ?

Do you by any chance have the RAT stub they sent you? Mind PMing it to me?

TNF. - December 23, 2015, 2:31 am

oh my god this is going to be a chaos

Realizm - December 23, 2015, 2:34 am

Here we go lol. Well, looks like Dr Watson is in for a surprise.

?
^

Obviously just a little troll kid

?mad?us - December 23, 2015, 2:36 am

Well let's see how this goes and if it's actually legit.

Kebabs - December 23, 2015, 2:36 am

i mean post some proof you were compromised...

Realizm - December 23, 2015, 2:39 am

????????????????

The email wasn't even changed in the last 4 months either...

SIM-1169085 - December 23, 2015, 2:39 am

llol omg this is going to be a horror story.

Cibor - December 23, 2015, 2:40 am

Obviously this is a troll lol

Zexo - December 23, 2015, 2:40 am

Well this should be interesting to watch.

J?son - December 23, 2015, 2:42 am

Seems like a troll post.

If this is real then it's probably a scam of some sort as he has 2fa on.

Epicur - December 23, 2015, 3:11 am

I believe Nex has not been compromised...Just some kid trying to troll the forums probably from a library computer or some anyonymous place...

So sad people has so much free time.

Raymond Reddington - December 23, 2015, 3:14 am

This is a troll obviously. LOL.

this is enough to prove that this is fake. As if the hacker has been on the account since this time, Nex would have noticed a while ago.

Mr roger waters is on the case bois!

Roger Waters - December 23, 2015, 3:25 am

Not surprised this kid has made yet another fake temp account impersonating a well known member

here.
