Thread: [Connection failed: MySQL server has gone away](#)

DataDumper - December 23, 2015, 1:48 pm

Hi guys

so i have dumped a sql and i want to connect it from dbNinja on my remote PC

all i get is

Code "Connection failed: MySQL server has gone away"

any issues for that? i know its max_allowed_packet, but i wont change it its not in my range, any ideas?

i have

```
Code $servername = "*****";
$username = "*****";
$password = "*****";
$dbname = "*****";
```

Mr.0_0 - December 23, 2015, 2:10 pm

Very rarely will you be able to connect to a database remotely. Try to use HeidiSQL to make an authentication attempt towards the database. You can also scan the host on port 3306 to see the status of that port. Is there an error code or was it just that error?

DataDumper - December 23, 2015, 2:29 pm

That error, and the port 3306 is open

i know i checked ports

Code PORT STATE SERVICE

```
21/tcp open ftp
22/tcp open ssh
53/tcp open domain
80/tcp open http
106/tcp open pop3pw
110/tcp open pop3
111/tcp open rpcbind
143/tcp open imap
443/tcp open https
993/tcp open imaps
995/tcp open pop3s
3306/tcp open mysql
3690/tcp open svn
8443/tcp open https-alt
but url:3306
```

says that i have no permission to connect this MySQL from IP "MY PORXY IP ADDRESS HERE"

ProblemSolva - December 23, 2015, 2:58 pm

Its probably whitelisted so only they can access it, or it only accepts connections from localhost.

DataDumper - *December 23, 2015, 4:27 pm*

Ya sad i didnt shell it, otherwise i could connect from localhost... will keep tryin, thanks guys.
