What is it?

Sc00by's Automator is an all-in-one SUPER FAST Kik Auto-Responder. It works with Nox App Player and runs completely in the background of your PC! That's right, no mouse movements or keyboard input. You can continue to use your PC as the program runs! The list of features will be posted below, but some notable features include multiple message sets to decrease the chance of being ghosted, live picture support, mass messaging, and many more!

Why use it?

Every second you spend typing your initial messages to every client adds up to more than you think. For instance, let's say you e-whore for an hour and messaged 100 clients in that hour. If you spent just 15 seconds typing or copy and pasting your initial messages to all of your clients, you would be wasting 25 minutes of your time, when you could be using that time to SE current clients, as well as find new ones.

My easy to use, fast paced, multi-threaded program will help increase your profits, while shrinking the amount of time and energy you spend doing your day to day routine.

Features

- 3 Unique Message Sets to Decrease Chance of Ghosting

- Mass Messaging
- Live Pic Support
- Ultra Fast response time
- Automatic run (Currently being fixed)
- Support for links

Terms of service (Per TOS #1, You automatically agree to all TOS when you purchase a license)

1. By purchasing this software you automatically agree to all following terms of service.
2. I am not responsible for anything that happens to your Kik account
3. You are not to use this program to harass others
4. You are not to use this program to perform illegal activity, and all actions must stand with Kik's guidelines.
4. I am not liable for any harm or damages you may cause while using this program.
5. You understand that Kik will sometimes ask you to verify your account while using it
6. You are able to run Nox App Player on your computer.
7. No refunds, under any circumstances whatsoever.

**xZkuToR** - December 24, 2015, 12:41 pm

So this will send only one message to all new chats? It will just respond once? Cause that's what I need, nothing more.

**Scymo** - December 24, 2015, 12:44 pm

This looks beautiful. I am eager to see multi-message support.  
Any vouches available?

For something so easy, it doesn't need to be expensive, or a subscription. Although this has some interesting features. It will work with any android device connected to your network, It's pretty interesting. You could have your phone on your desk, and respond to all your chats on their remotely.

Currently it's tuned for bluestacks 2, it's much faster anyways, you will notice the difference when you upgrade! Although it should function just alright, I haven't tested it yet with my newest update, but the old one worked just fine with 1! :)

Live pictures will be available possibly within the next couple hours when I get home if I get time to finish the code!

Thanks for helping me find a couple bugs so now it's even more stable than ever!

I'm sorry to have to do this guys, but i'm editing my main post, and i'm raising the price a little bit. Those of you who have ALREADY purchased, you WILL NOT be affected by this.

This took off a little bit more than I thought it would, and it's eating up a lot of my time in order to run support, updates, and sales on a daily basis. I am maintaining my lifetime membership as I'm not trying to go to a subscription model. I CONSTANTLY roll out updates for this, and it takes a lot of time and energy, so to get a little more per sale will really help my drive to make this the best tool in this section.

Thank you for understanding, to those who are in the midst of PMing me (ALREADY HAVE GOTTEN A RESPONSE FROM ME), you will purchase at \$7.

The new price for this tool is \$15 LIFETIME MEMBERSHIP FULL UPDATES

When you see the function on this program, you will know that it is well worth your money.

Thanks again for understanding.

Yea! You should have PM'd me right after purchase! But i noticed you do not have enough posts to PM.

I'll PM you now, and we'll get your license activated :)

(Jan 1, 2016 09:29 PM)Zek02 Wrote: [\[CITE\]](#) Would this program work on Android phones? Currently it's designed to work strictly with bluestacks. It is 100% possible for it to work on your phone, it would just be a little bit of extra coding on my end.

I am thinking about adding this as an addition addon you are allowed to purchase after you buy for a small fee.

**2ez4sol** - January 1, 2016, 9:17 pm

That would be great if you will make it to work on phone too. Looking forward for that.

Vouch for this bot. Works well so it has my vouch. It does its job - I can't say "guys you'll make thousand!!!" because that isn't the bot's job. It replies with messages that you specify so if you know how to manipulate this product, the money's as good as yours.

So far I've been using it just for about a day, here's my review of this product..

very simple and straightforward, you only need to set it up in the beginning. Don't require a lot if you understand basics. The product itself is what I would call a "diamond in the rough", I just love how it works in the background. The only thing needed is to refine it (improve & small bug fixing) here and there and add a friendlier user interface. Anyway, this is just what I needed. Thanks.

Looking forward to the updates.

This bot is a bit hard to make it run I have followed everything in read me txt and it is working but to type on new chats is what I am facing problems it is not clicking new chat it waiting for you to click the new chat then what you fill in message 1, message 2, link and live pic is where the problem comes in.

it is typing only message 2 and sometimes link but sending live pic no. I think the seller could have make a video from start to finish mainly from the folder where the bot is, to pikek settings then for it

run smoothly. Because it keeps massaging one person with same message, no one responded.

Lifetime means the Lifetime of the product. I plan to keep this going for a while, as I have quite a customer base already. I've been spending days and days of work on updates, and creating a new version.

This is my main project at the moment, and seems that It will remain that way for a while.

To answer your question more directly, Your license will not just drop dead at any point after purchase. The program will remain functional.

It currently is an program that runs on your computer.

BUT

I am adding mobile support within the week. How mobile support would work is...

You would still run the program from your computer but instead of controlling bluestacks, it would be targeting your mobile phone. Whether it's plugged in via USB or on the same network, it's all possible.

I will be releasing this for a multitude of phones and their respective resolutions , if you are reading this and you are already a customer OR you are interested in buying and wish to use your phone please send me a PM with your phones screen resolution. I will be releasing the most popular resolutions at first, with new ones constantly rolling out.

Thanks for your interest, and thank you to everyone who has already supported me in my development of this program. It means a lot to me. I spent a lot of time to make this program, from

research to development. Each license sold, and all donations I have received have really helped keep this program LIFETIME instead of monthly.

Please everyone PM me with any questions regarding this program. I will respond ASAP!

The kik spam blocking algorithm is really complicated, and hasn't been fully cracked yet.

The main thing that I have personally noticed.

The main thing is the quality of your messages. If you are clearly spam, then you will be marked as spam. A lot of people surprisingly use the report feature on Kik.

What are you talking about? I think you're stuck in the mindset of using tools to master your craft is a bad thing.

As a pentester, are you to do everything by hand, or are you to use tools to increase your efficiency?

Your views are your views, but in the end of the day. Increased efficiency = increased earnings in a shorter amount of time.

Also, You may be under the assumption that my product e-whores for you. It only responds to your new chats, after that you must do your own thing. There would be no way to automate e-whoring with artificial intelligence.

Currently you cannot. Although, i could personally edit a couple things on your release to get it to work with your phone.

It's setup to work and interact with bluestacks, but any android device is in the realm of possibility.

For the future, I'm going to add different sets of source files corresponding to specific phones. You would simply use a dropdown menu, choose your device, and click start.

This is also put in place so people can use Genymotion, a much more powerful android emulator when running multiple emulators at once.

Hey!

Sorry i never got back to your post. The reason you would use this instead of a free mouse recorder is this isn't a macro.

A mouse recorder has only 1 way to do things, you can't make it vary. This being the case, everything is timed out. Although timing things out is nice, you also need to account for the processing speed of your android. By using my program, the next touch, doesn't begin until the last one has finished and loaded.

There is near 100% success rate with my bot responding to an unlimited amount of clients.

I am also releasing tonight the ability to set up to 3 different sets of messages, so that it can randomly pick between whichever set when running to avoid a ban. This isn't a macro recorder, it's a full kik automator.

I got this bot about a week ago and i'm not trying to talk trash i just think i have the right to write my opinion about it.

This program works but i wont use it for 3 reasons.

First reason is that you cant add some symbols in message (for example if your message have comma or bracket in it that symbol wont be posted).

Second reason is that i'm running 3 virtual machines at the same time and you can run this program only on one computer.

And last reason - you can only post live pic after message set has been posted, you can't add it in between or before message set.

So i asked seller for partial refund. He denied it and that's ok because first post here says no refund. I just don't like that seller mentioned how he always wins disputes (I never said i will open dispute against him) and that he will open deal dispute on hackforums against me (i don't even know what that is lol).

After all this i am back to my macro recorder and i improved my script with few 'if statements' and now it runs without any bugs, all that for \$0 and anybody can do it :)

We are you sorry you have run into these issues, here is our answer to each question.

1.) No refunds have ever been processed, it's just policy. Sorry you seem to have missed this in the main post.

2.) Symbols: There are certain symbols that are banned but a COMMA is NOT one of them. Symbols like <>{}() We have provided work arounds.

3.) Multiple VM's: in the OP we state what's included. (1) License is included. Sorry you have seemed to miss this in the main post.

4.) Live Pics: You have never mentioned the importance of moving the picture between messages to our support team. We will gladly add this into the next update, users will then be able to decide what message they would like there live pic to be placed after.

Do you have any other concerns we can cover? Please let us know at

Why are you using NOX if I may ask?

We currently use Nox as it allows the user to seamlessly start and stop automation, while being able to go back to work and continue talking with their clients normally. It's legitimately as easy as clicking a button.

The Kik API is good for what it is, we've certainly looked into it, and thought about it many times.

It used to be for BS. I have decided to switch to Nox as it is about 50% faster.

BUT

It will still function with stacks properly, without the autorun feature. I still have all the old BS settings files for my program so it would be easy for me to get you running on bluestacks if that is what you need!

We used to use Bluestacks as our emulator of choice, but now we use and support Nox App Player.

You could find a VPS that has a graphics card. I've been told by a few of my customers that they use Amazon Web Services.

I'm confused on what doesn't work. I'm about 99% certain you are one of the most recent customers and your issue may lie in the fact that I haven't activated you.

Please PM me. If you have messaged me on skype, there is a chance you have added my impostor account and are not actually trying to talk to me.

Let me know what the issue is, if it's "Access Denied" simply PM me to get activated, anything else shoot me a PM and I will also resolve your issue quickly.

Thanks!

One PC per license.

Sorry for any inconveniences this may cause. You can always purchase 5 or more licenses in bulk with a discount. Contact me for further pricing if interested.

If you're a first time customer that is interested in buying in bulk, but want to try the program first. I will sell you the first license at normal price, and release the rest to you once you have tried and are satisfied with the program. All you would need to do would be to cover the difference between the \$20 initial cost to the final bulk price.

Contact me for any further questions.

The only PM I have from you is from a week ago. If you have purchased, in the setup instructions links you to my support skype to get your license activated. Everyone on my skype I have responded to on a regular basis, if you have been contacting me and I am not answering it is very possible that you are contacting an impostor skype. To my knowledge there is one other person with a fake skype of my identity. I don't know their motive so I would always suggest double checking with me on HF via PM to make sure you are talking to the right Sc00by.

If you have any other questions feel free to check your PM's. I will be sending you one shortly after this message.

No. It does not contain any sort of artificial intelligence to respond to clients. You still talk to them. This bot just sends them your initial message, link, and picture. Most of my customers use this for CPA or for initiating conversations to weed out time-wasters.

**Sc00by** - March 28, 2017, 7:25 pm

Massive update being pushed RIGHT NOW.

New thread design as well.

#### CHANGELOG - v4.0

##### 1. A huge user friendly update

----- Automatically connects program to Nox App Player

----- Automatically saves all messages as they are entered

----- Warnings for Nox connection issues as well as status updates

##### 2. Substantial speed increase

##### 3. Less memory/cpu usage

##### 4. Much more reliable when running for hours on end

##### 5. UI Tweaks

This is huge, all previous customers are going to love this new version as it is MUCH more user friendly than it has been in the past.

Please get back to me on skype i have a few questions mate

**SmoothCriminal412** - April 14, 2017, 10:01 am

Hi sc00by I purchased this two days ago and have messaged you on Skype, Hack forums and emailed you and haven't recieved a response, can you get back to me please?

**SmoothCriminal412** - April 15, 2017, 6:33 pm

Still no response from scooby, not sure what happened to him

Sorry mate, been focusing on my final semester in school. Had to take a week break from HF to study.

I just shot you a PM, activated you and you're all set :)

**Luxuryy** - May 25, 2017, 1:15 pm

buying this right now! will tell you how it works out!

**Luxuryy** - May 26, 2017, 9:51 pm

It is not working as of right now.

**Luxuryy** - June 3, 2017, 9:29 pm

Helped me with the software! Works Flawless! Thanks sc00by. <3

**kallegracias88** - August 6, 2017, 11:49 pm

Why the heck did you inactivate the HWID for everyone?! I need this bot dude...

NotOK when we paid for it.

Sc00by deserves anBIG BAN from HF! He sold us a KIK automator which he later on shut down. So now everyone paid but NO ONE can access the program. You need to FIX THIS \_NOW\_!

**Shamax** - September 27, 2017, 2:20 am

how can send me kik autoresponder

**Sc00by** - May 14, 2018, 10:34 pm

After a year off the market, I have decided to re-release this program. All old customers please contact me with your sellfy or coinbase receipt. Without the receipt, I will not be able to re-activate you and i'm sorry.

I deserve a big ban? That's right, because I was the first person to ever decide to stop selling a program or service on Hackforums lol....Luckily for you snapchat is dead, and it's re-released. Contact me via PM, I remember you from a while back and just checked your purchase history, I will get your license set up.

Cheers man, I appreciate the kind words!

Available for sales. Purchase via link in OP, or contact me directly!

**Unkind\_** - May 16, 2018, 12:39 pm

EDIT EDIT: Overall, a general misunderstanding concerning a troll/ fake account. I virustotal'd the executable in the folder and it turned up as having a trojan in it. Supposedly because it edits and messes with hardware configurations it can be flagged as such. Coupled that with the decrease in computer performance I have been having recently due to unknown circumstances led me to believe the OP could not secure his own users safety.

While I have to say the support for this app is lacking, there are never any updates to the program or to the user, the program itself is useful. It actually works as marketed and I will gladly be using it again. Let's hope something like this doesn't happen again. Vouch for Sc00by.

Yes it is, sorry I just can't edit this post as it has hit the edit limit. Only way around that is a paid sticky. That is the only reason I haven't placed the auto-buy within the OP.

I'll send you a PM mate.

Hello,everyone, i have recently been compromised and my skype and discords are no longer safe. I am working on getting them restored. Now since the attacker may have compromised my hwid server the kik automator might contain a backdoor so please send me your copy of the automator so i can disinfect it. I cant PM yet so please upload the automator to either zippyshare or sendspace. Thank you.

Hey there sc00by. I was about to post on here again;

I recently sent a message to the OP account stating that my access to the program no longer works. Can you please PM me with regards to this; and are you able to provide proof that its you? Sc00by keeps logging on I believe.

Now I feel like i'm more than worried if there's a possibility I got backdoor'd.

Also just realized you cant PM anyone; can you please provide a new way to contact you?

**\*\*BEWARE\*\* DO NOT DO BUSINESS WITH SC00BY or his (now questionable) "bot"**

I purchased his bot 2 years ago and it "went offline" 2 days later. Didn't even use it bc it didn't even work, tried 2 diff virtual machines running windows, followed his instructions perfectly and still nothing. I went and bought a PC only to find out the bot went offline. No refund no nothing. Whatever. Shit happens, moved on.

2 years later its "online" supposedly so I message him and ask for the updated file, sent him screenshots of proof of payment and what do I get? Ignored. Since July 13 when I first messaged him about getting the updated bot he has given me every excuse in the book. examples include:

"Hey, i'm away on every weekend so never expect a response then"

"I've been on vacation past 2 weeks, and going again this Wednesday and then two more weeks in august"

"i'll hyu when i'm home from work, sorry on break atm"

"Mate, the more you keep bugging me the more I'm gonna ignore you."

"I just got back from holiday today, i'll look up your receipt when i'm home from the airport if I remember"

You can imagine my frustration getting these types of responses after 8 days (plus 2 years) of just trying to get a damn bot. I call him out on his customer service and I get this response

" Lol.

I also reserve the right to discontinue any license at any time, for any reason. Keep being a prick and i'll just fuck your license off forever. I haven't given service to anyone for the past week or two as I've been busy and on vacation.

Not my fault you don't understand.

Now kindly fuck off"

If I were you, I would stay away from this guy. As you can see he will just take your money and then discontinue your license the moment he gets butthurt. People suck, money comes and goes, but just wanted to warn everyone on here. Might save you some money and headaches.

As far as the "bot" goes, shit is fake, probably doesnt even exist. I gave him money for nothing, live & learn.

The bot is real; I have purchased and received it. It's been working up until this last week.

TBH this makes me smile bc in the end all i really want is the bot. I paid for it, i sent him his screenshots, I gave him more than a reasonable amount of time to respond/send (that i can verify with skype timestamps) its not as if i was blowing up his inbox with 100s of messages.

As far as I know, this software doesnt exist. Sc00by what is your problem with me? why such shit customer service? Can i have my bot please?

**Fuzuliman** - July 23, 2018, 2:46 am

Vouch for - Sc00by -

You won't regret it

Don't wait to buy

**Sc00by** - July 23, 2018, 9:12 am

I have been on vacation for a long while. Not quite sure why people don't understand that.

If any issues arose during the past week or two, I did not get to them. That's that.

I can also confirm that this user is not me. If you sent this user any money, information, anything, that is on you. I'm not quite sure why anyone would do so, but just putting that out there.

The download link for the program is in your skype, feel free to download it, read the instructions and contact me for activation.

My problem with you is that you have been nothing but rude, obviously I will be rude back. I told you I was away, i was working the few days I was home and I didn't have time for much of anything. You were impatient, I didn't respond to anyone in that time frame, you included. I'm sorry if you want extra treatment, I can't help you there. Also i severely doubt you purchased the bot and then it went offline two days later as I disabled sales far before the servers I used to run went offline. It was open for months and months after I had stopped sales years ago.

I did not open this thread to re-open sales entirely. I paid for a sticky for a week so those who used

to use the program could see that there is an updated version and contact me. As my backups for licenses have been lost over the years, i reopened this thread so old users could send me their information so i could go ahead and send them an updated version.
