Thread: [Win Lifetime Premium Webhosting \[Unlimited Everything\]](#)

Calcyon - December 24, 2015, 2:45 am

This is for L33T / UB3R members only.

This is for legal websites only.

Post why you want this and why you deserve it.

Giving this to 3 people.

Merry Christmas!

B FOR BADASS - December 24, 2015, 4:49 am

I need to host my website using wordpress. So, I need hosting so as to run it. Thx

Online Sir - December 24, 2015, 5:45 am

Hey,

I wouldn't mind this - I can use this to host my projects.

Thanks

LilDurk - December 24, 2015, 5:47 am

Wouldn't mind grabbing an account, I can use this to make a page about OmegaProducts. Also I'd make free tools for everyone to use.

Wireless Network - December 24, 2015, 7:19 am

I want it so i can come back into CPA game and host my sites there, and about why i deserve it,.. there's no any special reason why would i deserve it more then others, i'm simply active and helpful member of HF.

Ætμ™ - December 24, 2015, 9:07 am

Posting to enter,

I need this for my business as I've been having a very hard time lately with webhosting providers. I deserve this because my business is 100% legal and legit and has great prices for our customers compared to other websites.

Infinity. - December 24, 2015, 9:12 am

Can I get it bro? Thanks a ton.

Sahaj - December 24, 2015, 9:19 am

I would love to get a good lifetime hosting. I own a tech blog (techblimp.com) and I write articles and work hard, I bought hosting for it 6 months ago, and it'll expire within next 20 days. I thought that blogging would be a great way to earn some money while continuing my study, but I think it'll take some more time than I expected because my adsense account is still not verified and I can't monetize it, so I can't really afford to pay for hosting every month, but I really want to work hard on my blog. That's pretty much the reason. :)

Merry Christmas and happy holidays! :)

josimc - December 24, 2015, 9:44 am

I would love to get this lifetime hosting! I would love to learn more about websites and web design, and this could be the start to a new adventure in my life. I am looking to get into computer security as my future job and this could help me learn about the basics and some advanced stuff with websites and how you can secure them.

I don't really have the money to afford a good reliable host, so this would be major for me and my future! Thanks.

Merry Christmas!

Calcyon - December 24, 2015, 1:16 pm

Looking to see more entries! This will end 12/27/15

Anissobest - December 24, 2015, 1:26 pm

i want to run my first website for Algeria it'll contain a lot of thing such as ressources for student , cheap rent houses for them and many others things that concern student in algeria

The Zero - December 24, 2015, 1:40 pm

Well as web developer, this will come in handy if this is some good company that won't die in next 1 month like every hosting I got from this forum

V3R7!90 - December 24, 2015, 3:19 pm

I would like to use this for some projects
I think i deserve this because im nice ^^

Calcyon - December 24, 2015, 3:21 pm

Nice requests so far. Already have 1 out of the 3 users "selected".

DuguWudi - December 24, 2015, 3:42 pm

Can I have it, might be useful for my blogging/etc?

Thank you.

VirtualFrost - December 24, 2015, 4:02 pm

I'm currently in development to making a forum + services and functions to use with this forum. Without going into details of it all, it will be primarily market based. I have known HTML + CSS and currently expanding on PHP at this time to help further this website. Along with this hosting, I currently have the funds for a domain and purchasing of a custom theme, however I am currently exploring making my own. I want to be able to build up a community on trusted members and give everyone a place to sell whatever items they're looking to sell, whilst feeling safe to do so. Policies are being planned and all has been documented/being documented on what needs to be worked on, what has been thought out and what has been thought out and needs to be put in place. With this hosting, I'll be able to get a head start and continue to live test the website to make sure everything is going well and to make the migration from my computer to the internet a lot smoother. I have had previous experience with paid hosting (hostgator.com) so I have knowledge around web hosting. In addition, with it being lifetime, I wouldn't have to worry about bills whilst developing it which like I said, helps significantly.

Thank you for this contest and good luck to all. Merry Christmas!

alexatie - December 24, 2015, 4:42 pm

I need web space to store my porn stash. My dropbox is getting full.

Calcyon - December 24, 2015, 4:43 pm

Yeah, how bout no?

Biker BoyZ - December 24, 2015, 4:44 pm

This would be brilliant for me for my CPA Sites. Thanks for contest.

Wander - December 24, 2015, 10:12 pm

I am starting an education website that provides video breakdowns of college-level science courses. This would not take a lot of resources with videos being embedded, but I would love the space.

Thank you for hosting this!

LilHackers - December 24, 2015, 10:42 pm

Posting to enter!

Cheers mate ?

Cheers mate ?

Remember to post why you believe you deserve this.

DarkSerenity - December 24, 2015, 10:48 pm

I would like to create a website that has everything that one can think of I know it will require hell a lot of time but I was thinking of creating one that

has (Forums, Research, Market, Education, Comics, Anime, Movies, Social network, Donations,.. etc) everything people could ever need instead of opening multiple different websites why not have everything in one? I will probably work with multiple people to achieve it and let people manage each section but it would be awesome from my point of view!

Armagedon - December 24, 2015, 11:53 pm

Looking to start a online business soon, this would ne very nice and helpful.

Calcyon - December 25, 2015, 7:57 am

Merry Christmas, guys!

This ends tomorrow!

Ætμ™ - December 25, 2015, 8:20 am

Merry Christmas! Hope I win, could really use this!

OversouL - December 25, 2015, 9:27 am

Why I want it: I'd like to use it to learn more about web development and web administration.

Why I deserve it: I don't know if I deserve it. I think I've been nice enough this year to deserve something for Christmas. :) If I do get it though, it will be used nicely.

'Cynical - December 25, 2015, 9:31 am

I want this just for testing projects and to run services off of if I ever end up releasing any.

I wouldn't say I deserve this, but it'd be a nice thing to have.

Calcyon - *December 25, 2015, 7:26 pm*

This ends tomorrow! Join while you still can!

This ends today. I'm giving it around 3 more hours for any last-minute entries.

Closing this now. I'm choosing the winners now.
