Thread: [Xtria IXSI Bot Exploit \[700Gbps Capacity\] \[Nulls Cnservers/HighTierservs \[RELEASED\]](#)

Drinkz - December 26, 2015, 6:23 am

Just released the Xtria IXSI Exploit as promised. This exploit will scan and grab Vulnerable source engine servers. I have bought this exploit from someone on this forum, and since people are struggling to find bots and only bad routers i decided to release this and yes i have been able to null cnservers and even down there Datacenter with this also been able to easily null servers using vox bgp this is by far one of the most advanced bots to date, very well made. this will be my final release/contributing due to my rep

THIS IS NOT SOME SHITTY BRUTER BOTNET YOU'RE USED TO

Attack Methods included

L4

UDPPROTOCOL

TCPPROTOCOL

CPU-DXI

L7

HTTP-GET

HTTP-Cookie

HTTP-Manipulation

RECENT DSTAT I TOOK WITH 1.7k bots

With both udp

and tcp

Just released it

keep in mind this isn't some garbage .c files these are .cpp/c++ files that are not compiled and you'll need to compile them yourself if you're clueless about C++ don't bother.

Kumara - December 26, 2015, 6:24 am

Shiid, shoot me a PM when you do.

rezzex - December 26, 2015, 6:26 am

Seems nice :) Bookmarking me this Thread.

Hostile Coder - December 26, 2015, 6:36 am

Amazing mate i'm also bookmarking this actually i'll just keep the page open :)

devsky031 - December 26, 2015, 6:54 am

amazing i will BM this ...

????II?? - December 26, 2015, 7:24 am

aight nice

send me a pm when its time!

SIM-2198759 - December 26, 2015, 7:24 am

That Dstat looks copied from other threads... I've seen it before.. Look at "Current hour" theres no attack running.

Drinkz - December 26, 2015, 7:25 am

(Dec 26, 2015 08:24 AM)?DeathStr0ke Wrote: [\[CITE\]](#) That Dstat looks copied from other threads... I've seen it before.. Look at "Current hour" theres no attack running.
tinyimg scan it., you won't find it anywhere else. And it's the public VOX bgp graph ofc it's everywhere

Kkkkrabs - December 26, 2015, 7:53 am

damn merry christmas keeping this thread

Drinkz - December 26, 2015, 8:09 am

This was just released enjoy.

(Dec 26, 2015 09:30 AM)Hostile Coder Wrote: [\[CITE\]](#) Anyone doing a tutorial on full setup for this?
If no one on this forum can figure how to set this up in under a day there will be a tutorial released.
(Keep in mind this isn't near anything you've setup before completely different. Not even
IRC/P2P/HTTP. Hoping to run into someone who knows something about Source.

Hostile Coder - December 26, 2015, 8:38 am

I'm currently learning C++ that's probably why I have no idea what i'm doing XD if you feel like it PM
me the tutorial thanks man.

Hostile Coder - December 26, 2015, 8:46 am

(Dec 26, 2015 09:43 AM)0x2142 Wrote: [\[CITE\]](#) Awesome share! Finally got it to work!

Best code I have ever seen released on this forum. ?
Could you help me out i'm not sure what to do?

Hostile Coder - December 26, 2015, 8:57 am

(Dec 26, 2015 09:54 AM)0x2142 Wrote: [\[CITE\]](#) If you read the code you can see you have to
generate a crossproduct man, which means you need to download the cross compilers and compile
the matrixes you get, to get the crossproduct payload.

You can make your matrixes by finding the best vectorvalues outputted by scanner ?

When you have the crossprouct payload you can start exploiting!! ?

Like I said idk shit lol could you PM me a list of commands to set everything up like a normal tut
would have?

Exactly. It looks like one correlated to game mods as it has pitch, yaw and direction variables.

SIM-2223238 - December 26, 2015, 4:47 pm

This may be one of the biggest leak ever, but I am realising lizardsquads udp attack.

They never used a botnet but only used this script to hit offline sony.

<http://pastebin.com/raw/i9LXn6EX>

I will be removing this in 5 days.
