Profile link: hackforums.net/member.php?action=profile&uid=2562432

Hello, i lost the Password to my Account due to my factory reset 2 days ago. I tried to reset my password but the new password i get never works and says Invalid Username or Password.
prntscr.com/9iq355

Now i tried to name my temp account "T?????CTEMP" but it says

"You can't use T?????CTEMP as username

You may only use alphanumeric characters, hyphen, space, period and underscore."

So i believe that my Username "T?????C" has invalid chars and thats why i can't login. (You can't use your email as your login anymore)

I think the best Solution for this problem is to change the name of my Account back in "Toxyiic".

Thanks for your help. ?

I have 2FA enabled and my Trustscan is clear. (My friend scanned for me)

Doesn't look good

Quote:If an upgraded account has 2FA enabled (GAUTH) and is stolen or lost and reported before any Deal Disputes threads, scammer reputations, or Deal Dispute Database entries are placed against the account, the account will be banned as "Possibly stolen, lost, or compromised." Pending an investigation the account may be recovered to the original owner provided enough evidence of the accounts original ownership.

All account reported lost or stolen are subject to a Rep Kill. If you lost your credentials you are irresponsible. If your account was stolen you are not security minded. In either case we're going to RKO your account.

I already did that but i can explain the problem much better here and i didn't got a reply for 3 days.

ToxyiicTEMP - December 28, 2015, 3:49 pm

Still need help please.

CRT - December 28, 2015, 4:44 pm

T?????C

Try using that exact username. C+P it to the username slot then proceed to login normally. Lmk if it works.

?MIN?M - December 28, 2015, 5:27 pm

I lost my password along time ago. I emailed where it said to but never got a response.

National Security Agency - December 28, 2015, 5:31 pm

T?????C

Try that username and your old password?

Just be patient, you won't always get a response within 48 hours, Omni's a busy guy.

KFC Watermelon - December 28, 2015, 11:13 pm

You didn't lose your password (if you did, you can reset it yourself via email and it not be an issue). You just can't login due to the special characters within your username. Perhaps Omniscient will change your username for you.

Calcyon - December 28, 2015, 11:15 pm

If I'm not wrong, you're not allowed to use usernames with special characters to login anymore as email logins are disabled.

ToxyiicTEMP - December 29, 2015, 9:18 am

No offence but why didn't you write the info down and not use special characters in your username?
My credentials are written on paper and in my safe lol...Using special characters fucks you over to login with, the warning about Email being disabled on login was posted like over a month ago :(Hope you get it solved mate

EDIT: Okay maybe not a month ago, about 3 weeks but still...
