Female slaves are worth more than male slaves. Male slaves go for 0.05-0.07 and females can go way higher :)

Matt Bomer™ - December 27, 2015, 9:30 am

Whoever got it first is obviously going to bot kill so that others and OP can't have access to it. haha

UCV-\$47 - December 27, 2015, 9:45 am

Like I said I have many, I will only give 1-2 per person, so they can't be botkilled. If you receive them you are more then welcome to botkill. It's not hard to target females.

nenadv - December 27, 2015, 10:18 am

sorry for my noobness, but how can you trade slaves, for example if i want them i have to give you my client file and you execute it on their pc?

and one more thing, when you infect a pc, how to make client file undetectable to AVs once its in the system, it will get detected on some AV update.

SIM-1534439 - December 27, 2015, 10:21 am

Either way you guys are a bunch of fucking weirdos. Just because they're girls so you can spy on them.

Freaks.

Yes, the person you're getting slaves from has to update his slaves with your file. To remain undetected from a AV (runtime) you'll have to buy a good crypter and update your client file with a fresh crypt from your crypter and send them it,doing daily is the best option

Files always get detected. There is not a true way to keep it safe. But once you grow past like 5k slaves, they will spread so 1 or 2 losses isn't a big deal.

A skid who is also a fucking creep.

HitSweMan - December 27, 2015, 11:13 am

HMU on PM if you still have some girls or any bots in general that you can give! Thanks!

Dwalf - December 27, 2015, 11:16 am

All these people bitching about using/selling female slaves. The only use for a female isn't wanking to their blank expression while they're using a pc. I'd figure most of the people who got them from OP are trolling them or some shit, just for reactions. People always jump on the hate bandwagon to seem normal smh.

If somebody wants a female slave, who's to stop them?
(Also OP, you used the wrong than on your thread title)

PrivateMessage - December 27, 2015, 11:46 am

I'll take some, tbh I just want some slaves because I don't have to many and am trash at spreading.

Mr. Robot - December 27, 2015, 11:51 am

Besides the nudes you can pull from her sent images on facebook messages -
female slaves can be higher quality depending on what target you are after - of course if you are after steam shit, only certain females will fit that area.
I have built ewhore packs from videos and images chicks have sent me or from hacked accounts and sold them in the past as private packs so I know they can earn a shit tonne of cash like that.
