Thread: [\[TUT\] iOS 9.0+ Screen recorder NO JAILBREAK!](#)

sHAY - December 26, 2015, 5:39 pm

How to record your iPhone screen without jailbreak!

[img]http://s12.postimg.org/rziazworh/divider.png[/img] About

This will work on all your iOS devices over 9.0+. The amazing part is that you don't need jailbreak to do this!

NOTE: You will need an invite code to get this to work 100% ATM. Invite codes will be fairly easy to find if you just search for it. [img]http://s12.postimg.org/rziazworh/divider.png[/img] How to install & use

- Step 1: Go to this website on your iOS device <https://shou.tv/ios>
- Step 2: Press install, then a popup will pop and then just press install again
[note: if it doesn't show on your home screen it is downloading and will show when done]
- Step 3: Open up AirShou.
- Step 4: A screen will show that says the application is not trusted, don't worry about this, just press cancel.
- Step 5: Go to settings -> General -> Profiles/Device management -> "Trust xiamen xinmi information technology "
- Step 6: You're now able to open up AirShou, so go and open that up and press continue.
- Step 7: You'll now be redirected to the App store where you will have to download "Shou.TV mobile game streaming!"
- Step 8: Download the application
- Step 9: Open up the new application you just downloaded and log in using some of the alternatives.
- Step 10: Allow access.
- Step 11: Once you're logged in you can now close the application
- Step 12: Open up the multi task option and close both apps.
- Step 13: Open up AirShou and press log in.
- Step 14: Now it will ask you for the invitation code. To get this you could either send me a pm and i MIGHT have one laying around or just search the web and you'll probably find one.
Their twitter will tweet out some codes every now and then. Their twitter is:

www.twitter.com/Shou_TV

- Step 15: Once you have typed in your code you're pretty much good to go.
- Step 16: Choose your name and the orientation then hit next step.
- Step 17: Press done on your keyboard and bring up the control center.
- Step 18: Press the air play icon.
- Step 19: You should now see the AirShou option right there, tap on it and select the mirroring option and hit done.
- Step 20: It will now start recording!
- Step 21: Once done recording open up the application and press stop.
- Step 22: To see your recordings hit the button on the far top right.
- Step 23: Tap your recording and now you have the options either to save it to camera roll, delete, play, open in..
- Step 24: ENJOY!!! ?

If you have any problems or just if you just want to leave a nice comment go right ahead!

NoHax - December 26, 2015, 5:47 pm

Damn, i have actually been looking for this in quite a while. Thank you man.

Marshall Mathers - December 26, 2015, 5:53 pm

Thanks man, I've been looking for this
still ly ma bby

Glad i could help! Im sure this will be helpful for a lot of people.

Herion - December 27, 2015, 2:08 am

This is gonna come in handy! A buddy develops apps and he wants to showcase a few.

Anytime man! ?

Durham - December 28, 2015, 3:53 pm

Thanks for the tut, and it's awesome that you don't need to jailbreak! ?

eightz - December 28, 2015, 4:35 pm

Do you know at what FPS it records?

sHAY - December 28, 2015, 4:37 pm

(Dec 28, 2015 05:35 PM)zaire Wrote: [\[CITE\]](#) Do you know at what FPS it records?
High resolution screen recording up to 1080P @ 60FPS

XeX Menu - December 28, 2015, 4:42 pm

I've used this for awhile and it records smoothly. Sometimes I used to get an error shortly after trying to record but it seems to be working well now.

Great for recording certain 1 on 1 activities on skype video call. ?

...was anyone planning on using it for anything besides skype and snapchat? Lol

h?ck?r - January 3, 2016, 7:30 am

Nice tutorial. An alternative is to plugin your iPhone to your Mac and go into QuickTime player and do a screen recording there also!

shellz386 - January 3, 2016, 8:16 am

Just got a code from searching on twitter and this shit works yo

It's lit

Hello Buddy - January 3, 2016, 6:35 pm

Thanks for this. Will definitely help on Snapchat.
