VPS and IRC hosting is your choise. Dont ask what Hosting allows botnet and such things. Go to Market - > Hosting. Search one by one, read reviews (Posts) and the T.O.S / Policys of the hosting providers.

Theres a bunch of places you can go to, most dont allow it but they dont really suspend you for it.

Heres some sites you can try:

Blazingfast.io

Hudsonvalleyhost.com

Wholesaleinternet.com

Ovh.com
