You'll need a few things before hand:

A jailbroken iPhone/iPod Touch.

MobileTerminal installed on the device.

A copy of "bochs.deb", which you can download from <http://www.#/?d=6M1PN3B6>

Once you have those things, follow these instructions:

Transfer "bochs.deb" to /private/var/mobile.

Run MobileTerminal on your iPhone.

Type in the following:

su

alpine

dpkg -i bochs.deb

It will then install everything for you. Do this command to exit out of Terminal:

killall Terminal

Do a respring and you should notice "Bochs" on your homescreen. Start it up.

Enjoy Windows 3.1 & Windows 95 on your iPhone or iPod Touch, despite how slow it may be!

Is this super slow on a 3Gs? Because I know 3G sure would fail trying to run this application from what I've heard.

m4n1Ac - June 29, 2010, 7:03 pm

It might be faster on some of the newer models.

Boxxy - June 29, 2010, 8:37 pm

it worked fine when i used this before on my ipod touch 1g :D

Braco Asshole - June 30, 2010, 12:37 pm

Nice tutorial, it worked on my Iphone.

unos - June 30, 2010, 12:55 pm

who wants windows in his iphone?
windows sucks

m4n1Ac - June 30, 2010, 4:35 pm

Windows is a pretty good OS but your allowed to have your own opinion on it.

GTFO, I love Windows but then again what other OS allows you to really play video games on them? :P

SWS - June 30, 2010, 10:11 pm

I know this is probably a stupid question, but would I download this on my pc then sync to my ipod, or download on my ipod?

Whit? - June 30, 2010, 10:19 pm

sorry but windows 95?? i wouldnt dare use that tooo old :|

SWS - June 30, 2010, 10:20 pm

Well, any other OS is probably to big..

m4n1Ac - July 1, 2010, 11:16 am

Yeah, windows 95 is probably the only one that will work on iphone.

Yeah I've had on my iPhone before I upgraded to iOS 4

Thanks for this guide!

Thanks,

ARco
