What's your IGN

Ninetales. - December 28, 2015, 7:19 pm

...AND it's down. RIP server

Cakinka - December 28, 2015, 7:19 pm

RIP server is down now....

LogicInABox - December 28, 2015, 7:19 pm

:D good find I know :D I hope it's back up soon. Try not to crash it while using world edit?

Intel - December 28, 2015, 7:20 pm

You fucking idiots ruined it. I was about to get him to install Mineman's plugin, which keeps him disconnected via java exception. Little less obvious than banning him. Nobody did any damage. Nothing was accomplished.

LogicInABox - December 28, 2015, 7:21 pm

Rip server closed. Let's see how this turns out.

We were able to log back in and lava the fuck out of it.

thepixelhacker - December 28, 2015, 7:24 pm

omg ban all im done.. He needs mental help.

He did Imfao. He keeps trying to unban himself but can't because of his IP ban LOI

thepixelhacker - December 28, 2015, 7:37 pm

damn not op anymore.. xD

omfg stopping the server again.. this kid is retarded.

LOL he said he banned "fells" ffs and he doesnt even know me and dem are not even supposed to be on -.-

It's alright fellow minemen, the other members of Team Nodus Trombone™ are hard at work regaining access to the server and injecting our poison plugins directly into the servers code. We've had big challenges than this, we recently took out minemananalsex.co.uk which was considered to have one of the strongest noheat and anti forceop plugins known to man and we here at Team Nodus Trombone™ know that our supporters and fellow grievers like to stay up to date with the latest exploits and such so later today we will be releasing a working fullblock phase and a forceop plugin that automatically injects into the server owners toaster which will then upload itself to his network injecting any pc that dares connect to his router. At this point he doesn't realize the hell he has brought upon himself, he thought he could escape the clutches of Team Nodus Trombone™ little did he know we had already injected our rat virus trojan into his toaster and it had already spread across his network allowing us to gain access to his servers console where we oped ourselves but before we did we deleted his system32 so that he couldn't stop us. What a plan it was, however he did have a backup. He had a laptop we didn't know about, even worse he had the best antivirus known to man, Norton™ Internet Security. We knew we had our work cut out for us at this point be we activated our Norton™ bypass exploit built into the virus rat trojan and we deleted his laptops system32. We knew we had one at this point and continued on to grief his villages and homes. We found his secret obby base where he kept all his diamond armor and we burnt it to the ground. We then deleted all server files and removed any backups so that he wouldn't be able to rollback. Enjoy your day fellow minemen

NodusTrombone™ Dev Steve

was pretty funny
server is whitelisted now rip

Real Atdx - December 28, 2015, 9:17 pm

lmao the ghastrs and blazes wtf.

I'll see about disabling the whitelist

jkao4 - December 28, 2015, 9:19 pm

whitelist is gone I think, i'm fucking with owner right now
ign: bittcraft

gyazo(.)com/0b4d3d73133c0fa735875c4eec2cbe3d if someone wants to install a poison plugin
now's your chance.

server is officially dead now

lmfao good also, Demerzel installed his mine man poison plugin on his server xD

Intel - December 29, 2015, 8:14 am

I'm whitelisted. He trusts me. Not worth continuing to grief though, there's nothing there.
