Thread: [KIK How to send live picks](#)

satlanmet - December 28, 2015, 11:57 pm

every time they ask to proof i send them from gallery , and they ask for live ...

how can i use camera for live ?

Kudayoru - December 29, 2015, 12:07 am

You need a app called fake camera.

You can get it here - <http://apk-dl.com/fake-camera>

thanks alot guys !

_Celestine - December 29, 2015, 12:52 am

Using the old version of kik with fake camera works, but using a modded kik is easier and they often have more features than just the fake camera. Most modded kiks have their own delvik environment so you can install them along side each other.

Pikik was the original modded kik but it's starting to get a little outdated, you can get it here:
getpikik2.x10host.com

Matrik is also a great mod and is still under active development, unlike most others. You can get it here: matrik.org

Use Pikek

<http://pikek.com/>

It lets you use gallery pics as live pics.

qrzor. - December 29, 2015, 3:58 am

Fakecamera. I've been using that for months.
