Thread: [Bluestacks + Kik + Live Camera](#)

LethalCyanide - December 29, 2015, 4:10 pm

I've downloaded Bluestacks I have Kik. Now how do I send a Fake Camera pic

reacts - December 29, 2015, 4:14 pm

1 Tap the "+" button on the left side

2 Tap the Camera

3 It will let you choose if you would want to use the real Camera or Fake Camera. Choose the fake camera.

4 Choose the pic that you want to send

5 After choosing, tap send and you're done!

I hope this will help you OP!

You need the fake camera app.

Then do what above said.

LethalCyanide - December 29, 2015, 4:18 pm

I have fake Camera and i'm doing that but it doesn't pop up with anything. other places are saying I have to downgrade my Kik version but i don't know how to delete the current kik version i have

I've figured it out Retard clap

Try a different app. I know what you mean.

I couldn't downgrade mine, but I tried like 10 apps. One worked like a 1/3 of the time.

Use this APK to downgrade, and everything should work <http://www.apkdad.com/kik-messenger-6-6-1-52/>

Top or Feed - December 29, 2015, 6:21 pm

you have to extract the pictures / unzip the folders to send pictures
