Thread: [Fake camera isn't working with old kik?](#)

KK123 - December 30, 2015, 12:52 pm

I've always used fake camera with the old kik on bluestacks and never had a problem. Though recently after a short break of not ewhoring I come back and it is not working. What will happen is that I will click on the fake camera app and it will just take me to the normal kik gallery, with already saved photos.

Methods I tried that did not work:

-reinstalling fake camera and old kik

Please help.

Thank you

-KK123

Open settings and clear your Kik, Camera, AND Fake Camera defaults. Try it then

I don't have defaults for any of the apps, (besides camera which I can not find in settings?) though I did clear the data and cache for each and it didn't make a difference, it still isnt working.

Thanks for the response though

Settings > All > Camera

<http://prntscr.com/9kffbv>

Try now

You should download an kik apk called Pikek. Their site is currently down, seems it got attacked by someone, they just got their homepage changed haha.

I have the apk file, feel free to PM me and i can upload it on my Dropbox and send it your way!

Have you tried using a different app? There are different Fake Camera apps that work well.

Go to my guide, there is the perfect version. Uninstall fake camera before you install this apk.
