Thread: [\[REQUEST\] Mass twitter account creation](#)

alepacheco - December 30, 2015, 1:50 pm

How is it possible to create a large number of twitter account? Is there any tool of script? Thanks for your time. I'm new at this topic.

BanditDev - December 31, 2015, 1:33 am

I would say you are better off buying twitter accounts now, it would be very hard creating loads of accounts since they would need to be phone verified to prevent getting banned. However, if you are patient and have time you could register accounts by hand. You can have up to 10 accounts on 1 phone number, and you can then use free apps to get more phone numbers to verify accounts. If I find any bots or scripts around I will be sure let you know!

You can get 100 e-mail verified accounts for under \$6. In most cases you would be better off just buying them unless you need tens of thousands.

Co sign the other posters. Just buy accounts brah. What do you need them for anyways? Accounts on twitter are useless if they are inactive anyways

I bought mine from here and had no problems:
<https://buyaccs.com/en/buy-bulk-twitter-accounts.php>

Make sure you e-mail him if your PayPal e-mail is different than the e-mail you want to receive the .csv file with the account information. Takes under 12 hours.

You get account username/password/e-mail/e-mail password.

How many are you looking for? I could get a decent amount for you.
