SHA256: bc01f0af7a1157465f600dd63fc36df7003f1f5fc91c8c78f9ee8b7e7e977419

Review:

Functionality 10/10

The program does what it's supposed to do.

I've tested out all of the features, and everything seems to work out just as advertised.

I have found no bugs or glitches while testing this excellent piece of software.

Speed 10/10

While I was at it, I checked out the speed.

To my surprise this program was very fast, I expected slower reaction times.

But this program is indeed one of the fastest mention bots I have ever used.

GUI 8.5/10

The GUI could have been better, but it's all about the functionality.

The user interface will just attract people who judge by the screenshots.

I would say the user interface is none of my concern since all I care about is the speed and the functionality.

Overall 9.5/10

Overall this is a great mention bot.

It's a steal for the price, and +Nemesis provides excellent support with it.

I would recommend this product to everyone that is looking to make some revenue from Instagram.

I received a vouch copy for review, I am not affiliated with OP, this is an honest review.

Functionality 10/10

The program works perfectly as advertised, no snags or glitches whatsoever. Perfect in functionality.

Speed 10/10

Extremely fast, saw the results I inputted in blazing fast times. Again, perfect in regards to speed, couldn't ask for more.

GUI 9/10

I personally think it's clean and simple, easy to use as well, which is a bonus for newbies.

Overall 9/10

Overall this mention bot is awesome. It works as advertised, it's fast, and simple. OP is easy to work with and his bot works fantastic. If you're looking to monetize an Instagram, look no further than this bot. It's a yes from me.

I'm VERY interested in this bot, but I have a few questions.

1. How much would this cost me for making 10,000 Mentions every day?
2. How many accounts would that require for 10k mentions?
3. How many mentions per day can you make per account without it getting banned?
4. Do we need aged accounts, PVA accounts or will freshly made accounts work?

Thanks in advance.

Thanks in advance.1) Around 30\$ dollars for PVA accounts &
2) around 100 accounts minimum.
3) Around a 100 mentions each.
4) PVA Accounts preferably.

Note: I haven't used my bot for the last month and you might have to tweak the default settings but other then that it should still work as it used too.
