Thread: [Intro to IG PPI \\$5/10 a day method](#)

Rod\$ - December 31, 2015, 8:54 am

So its new years eve and i feel like being nice, ill share a small method with you guys which you can use to make an extra \$5-10 a day depending how much you can scale it.

DISCLAIMER

This will be simple basic information for a lot of you, but for those looking to get into cpa you may find this helpful.

DISCLAIMER

What you will need

Social media bot (massplanner) \$16/month

IG accounts (pva) \$0.30 each or so

Proxys (http dedicated ipv4) \$1-2/each

VPS (not necessary, leave your pc on 24/7)

PPI account (ogmobi will do)

Now what you will be doing is spamming IG with PPI, simple right.

You will now need a niche, there are a few you can choose.

Free game hacks (gta5 cod clash of clans), free tickets to popular stats, celeb phone numbers leaked (fake), Free stuff like followers, likes on social media.

Better yet try find a niche, look what games are popular on the app store, what games offer in app payments, and try make a niche out of that.

Once you have a niche you will need to set-up your ig page, post a few pictures related to your niche along with some hashtags. Try get some fake likes to the picture so it has about 1000 likes on it.

Basically pimp out your instagram page with your chosen niche to make it look nice and legit.

After this install massplanner and login, you will need to add your profile on the social profile section. Once its added you can go to the tools section and start getting the account to do action such as follow like comment.

This is where the important part comes in, you can't just follow like comment random users, unless you are doing a very general niche.

For example

Niche

Call of duty hack

>>

Follow like comment users WHICH follow a semi big, very active call of duty page.

This means the followers you are following and liking are Call of duty fans, so they will be more

inclined to go to your page and see what's happening.
Set your settings to about 300 follows and 300 likes a day.

You will need to have a PPI link in your profile or even better have a second profile on private which has the PPI link in its bio, and from your main spam account have it linking to the PPI profile

Spam account

>>

Checkout @PPIPROFILE for free coins

>>

Links to PPI ig profile with link on.

You will need a content locker on ogmobi, you can title the lockers to anything you want so put something along the lines of your niche, or something like "You must download and install 1 app to verify you are not a robot!"

Once you have your mobile content locker make a goo.gl or bit.ly [WARNING: potentially infected] link or a .com if you have the money and have a url redirect your your ogmobi link.

Now 1 account follow and liking may only get you 20-30 clicks a day resulting in \$2-3 a day which is low yes, but you need to start scaling.

Buy more ig accounts and more proxies, set them to all "mass" off other accounts related to your niche.

MASS = Leaching the followers off another account so you get TARGETED traffic.

This is a brief run over of each concept and you WILL need to learn yourself, massplanner have a very good help documents for each feature in their tool.

Any questions please leave below and i will try to answer quickly.

Rod

Thanks for sharing this, nice little money making method :)

BoyInWhite - December 31, 2015, 9:54 am

This is actually a pretty nice guide.

You could also always DM your followers with your link =)

BlackHat420 - December 31, 2015, 11:06 am

I really hate to ask this: Can you explain in detail about using the proxy as in how to use them and why you need proxies. :)

- thanks

Proxies protect your accounts from getting banned.

If you use multiple accounts on one IP they will get blacklisted and removed.
But if you use a proxy on each account it will change its IP, so all the accounts you would use come from a different IP address.

You can read more on Proxies here: https://en.wikipedia.org/wiki/Proxy_server

The internet is full of free information... learn to use it and you won't have to ask questions like the one you just did.

HF also has a search function <https://hackforums.net/search.php>

Hello, thank you!

Yes DM works good except massplanner you need to buy an extra to get the DM feature i believe

Jinz0ms - January 1, 2016, 9:28 am

Thanks for sharing this method.

youw0t - January 1, 2016, 2:58 pm

Thank you for this method, it looks pretty solid and I am going to try it out soon.

Ask any questions on the thread so i don't get lots of PM's :)

OddestFuture - January 1, 2016, 8:09 pm

Wow... A actually helpfully starting IG PPI guide. Thanks Rod you are not getting enough credit and thanks for this bro. Tomorrow I will definitely look more into depth into this. I have been wanting to invest into some methods to make some money. I have money to invest into products and stuff so this is perfect to get me on my feet again. Thanks OP!

Kcquipor - January 4, 2016, 8:24 pm

Hi man ! Thanks for the guide :) but do you got any tips for good money making niche ? :)

Got a IG About "food" niche but i think that niche can't work with ppi sadly :(

kholubholu - January 5, 2016, 9:38 am

Thanks for this, nice little money making method.

This is the hardest question to answer because its unlikely anyone will hand you a niche.

Think of something popular, recent and on demand is what I usually go for.

Saturated niches can make money if you spam enough and use the right hashtags.

Louisveret - January 6, 2016, 2:46 am

Will definitely take a look at this When i get hlmey, thanks OP
