Hello guys,

My sister restored her iphone but she forget her apple id pass and she cant open the iphone and you know if you dont know your apple id and pass the iphone is useless you cant bypass the apple id login. I tried to rest the icloud email to reset thepass but she have to anwser 3 security questions. She only know the 2 questions out of 3 and she cant reset the apple id . Any help please. The iphone is useless and it's brand new.

Thanks!

How2Hacks - December 31, 2015, 12:56 pm

You can contact apple support, thats what I did they reset my questions.

Once there reset, write them down and save it somewhere so you never forget them.

Or you can make a new apple id, but you'd lose your purchases.

You probably could try bruteforcing password also, with THC hydra, also.

pampos1 - December 31, 2015, 1:49 pm

you had to confirm tour personal details to reset your password? I tried to log in with my apple id but i couldnt.bruteforcing with thc hydra? What's that?

How2Hacks - December 31, 2015, 4:24 pm

THC Hydra is a program that uses a dictionary (theres a 15 million word dictionary on this site, google it) and keeps trying passwords in that dictionary with that username until it gets the right password.

There is another method of brute force which involves trying every possible combination of letters/numbers/symbols till it gets the pw.

It comes by default with kali linux and I think you can get it on windows with Cygwin or something.

On ubuntu I think you can use katoolin to get it.

is it free? Thanks by the way i will try now

How2Hacks - January 1, 2016, 7:57 am

@pampos1 I know this is late, but yes it is free.

That's not going to work and once you use it. This will void any warranty when you do the modifications. ?

Just contact Apple support.
