Hello, Im going to be teaching you guys a method I use to make \$5-\$10 day with Instagram on autopilot.

This method is great to make money and can help you make way more than \$5-\$10 a day. I personally use this to grow my accounts and make some side cash.

Requirements:

Instagram Accounts

\$10 Paypal

Patience

First thing you want to do is signup for massplanner, you can do so by using this link:

http://www.massplanner.com/?ap_id=revshf

Or check out massplanner.com its free to use for 3-5 days and then its a subscription for \$10 a month.

Once you have an account you want to instantly take advantage of the 3-5 day trial!

Grab an instagram account and go to social profiles and begin the setup!

Make sure you have 2-3 different accounts running different niches!

Setup Page:

Now here is where you want to setup your Niche, I personally have a page that follows 400 people a day and likes about 500 Pictures related to the hashtag I have set, here is an example of what my page looks like:

As you can see, I have my PPI Landing page link in the bio so whenever I follow someone or like their picture using the MassPlanner Bot, they check out my account if they want a free iTunes giftcard! Heres a picture of my follow settings:

The more people you follow and like, the better but you also run the chance of getting your account banned.

With this tool you can add multiple account so you can different niches running and following different accounts, etc.
