Who Soup - January 1, 2016, 7:33 pm

Fixin' to look for something sweet that's cool and fun to eat? Look no further! Who Soup's Rock candy is a proven delight.

What is it and how is it made?

Rock candy is a type of candy made out of natural organic sugar. It's sweet and has an unusual texture as you are eating it. If you haven't had this treat before you will definitely be amazed how cool this is to eat. It's made by growing sugar crystals onto an adhesive surface. Sugar crystals form over time which is what produces the candy and which is why it has a crystal/rock like texture.
