Thread: [Hack Vulnerable Website with IIS Exploit - NEW](#)

Byt3Door - January 2, 2016, 7:00 am

? With IIS Exploit we can upload the Defaced page on the Vulnerable Server without any Login. It is most Easiest way to Hack any site.

? STEP 1: Click on Start button and open " RUN" .

? STEP 2: Now Type this in RUN

```
%WINDIR%EXPLORER.EXE ,:: {20D04FE0-3AEA-1069-A2D8-08002B30309D}::  
{BDEADF00-C265-1 1d0-BCED-00A0C90AB50F}
```

? Now A Folder named "Web Folders" will open.

? STEP 3: Now " Right-Click" in the folder and Goto "New" and then " Web Folder ".

? STEP 4: Now type the name of the Vulnerable site in this. e.g." victimsite .com/" and click "Next" .

? STEP 5: Now Click on "Finish"

? STEP 6: Now the folder will appear. You can open it and put any deface page or anything.

? STEP 7: I put text file in that folder. Named "securityalert.txt" (you can put a shell or HTML file also). If the file appear in the folder then the Hack is successful but if it don't then the site is not Vulnerable.

? Now to view the uploaded site i will go to " victimsite .com/securityalert.txt" In your case it will be "[sitename].com/ [file name that you uploaded]" "

. NOW TRY THIS FROM YOURSELF ND CMNT HERE ?

tnx dude ..

but i think your bug name is Webdave...

old bug ..and work good in XP ...

you can hack all my target with your TuT ..
live target :

anyway tn timer for your TuT ..

good luck

Byt3Door - January 2, 2016, 7:38 am

Thanks for the information! Good Luck To! ?

seyt - January 2, 2016, 11:23 am

Nice information Thanks !

How2Hacks - January 2, 2016, 4:39 pm

"The folder you entered does not appear to valid. Please choose another."

Im getting this error even when Wappalyzer even says the site is using iis, please help :]

Cankiee - January 2, 2016, 4:45 pm

I get an error when i try t run it. help?

No shit but it's still rude.

Changing mine now.

I'am sorry for that I didn't know that anyone in HF already has this Avatar, I will change right Now!
Sorry for that!

Obs: Your Avatar can easily find on google!
Sorry for that! ?

Can I ask what you googled ? I know it comes up under
"Mr. Robot gif hackforums"

Ps. I got it 24,703 views in 2 weeks.

Only just uploaded this one today so will see how it goes.
