You get a legit .edu e-mail, if you can normally login from different e-mails with a official .EDU then you can do it with this one as well.

There is nothing different from a "real" .EDU and this one.

I'm not sure what you mean :p.

If you use this method you get a 100% real .EDU that is 100% legit and you can do everything with it just like a "normal" .EDU e-mail. If normal .EDU's allow you to login from different e-mail providers then you can do it with this one as well.

The thing is I'm not sure if .EDU allows different e-mail provider logins or not.

And if you have any extra questions please PM me.

You can use .EDU e-mails to get all kinds of free bonuses, like free Amazon Student prime and discounts on Adobe Software and from time to time even free Adobe software.
