Key Punch - January 2, 2016, 3:04 pm

CHALLENGE: --> Code <http://wxcode.sourceforge.net/showcomp.php?name=wxPlotCtrl>
For the completion of this challenge you must figure out what (waf/ids/ips)
Sourceforge is running.

Riddle me this: "Obtained the name of the waf at last but don't you see you have the key but lack the lock so why not give old SINGLE FEW ROT a shot?"

Haved you solved the riddle?
