If you have an jailbroken device on iOS 9 - 9.0.2 & doesn't have spotify premium this is going to be perfect for you!

This is a REALLY simple process, you might even already know what it is but im just informing ya'll if you didn't know.

So how to do this:

Go to cydia & add this repo: <http://repo.insanelyi.com>

Search for a tweak called BDayspotify2 and install it.

Done!!

This tweak includes

No ads

No force shuffle

Unlimited skipping

High streaming bitrate!

Was gonna try this on my iPad but I don't think it works there haha.

It's jailbreak'd though. But I don't find any "Manage" button when opening Cydia haha.

Does it also include downloading songs for offline use?

Everyone's Cydia has manage button or maybe look for like a Plus sign so you can add a source ? Should be in right hand corner

Found the source: <https://i.gyazo.com/cc677cb7bc8dbabe3a69ac5d90276bca.png>

What do I do now though lol? Don't even know how to "Search" for a tweak haha!

Type this url in: <http://repo.insanelyi.com/>

And hit add or find source :)

unfortunately no :/ You would have to use some sort of wifi/4g/3g for this

Phil-Veoo - January 5, 2016, 11:40 am

Doesn't it work with 9.2 aswell ?
