Hi Community,

just wanted to introduce you to an awesome website called "Dollr.club".

Just do simple tasks as registering on websites, installing apps, surveys and many more and you will get money for it. Once you earned 5\$ (earned really quick) you can order Giftcards whatever you want.. Amazon, Steam, Netflix, PSN, Xbox and many many more ..

Hope you enjoy it!

PS: I am the owner and also developer of the website. If you need help or anything else, please dont hesitate to contact me.

Also it would be awesome if you tell me wich giftcards you want to see also on the payout table.. we can add all you want.. if you have any other ideas (except of paypal) please let me know. (i thought about to add steam keys also..)

bug-reporting welcome..

greetings

Its not really quick

You have to pay with mobile or spent a lot of time on installing apps

10points per app

So 1000apps for 5\$

lol, apps are at the moment not really filled with offers.. you should use the offerwalls.. there are tons of offers where you get around 20-50 cents per task

i am still searching for good incentive apps-offers but at the moment there are not many out there.

also how much money you want for installing an app wich needs seconds? (the app owners give me like 15cent per download.. because for incentive traffic they pay shit)
