Thread: [Where is Cryptex Reborn?](#)

biscuit deluxe - January 3, 2016, 4:18 am

I remember I was in need of a crypter (not for malware) and I remember there was one that really caught my eye. It was named Cryptex Reborn and it had tons of features and a good undetection rate.

The thing is, I can no longer find it in the section. It is also usually stickied but it's not there.

I'm ready to pay to pay with PayPal but it's gone ?
