Thread: [LKF KeyLogger](#)

Illyrian - January 3, 2016, 5:22 pm

I'm looking for something custom made that I can attach to a photo or file. I don't care how much the price is.

TY

Sheeple - January 3, 2016, 5:25 pm

Simpler: Get a free rat (nJrat) and use a file binder to bind it to a picture. IMO Rats are better than keyloggers for various reasons.

I'm pretty uneducated with how to do these things which is why I'd willing to just pay whatever to get one done and binded for me.

what am i helping you with.anyway pming you

bloodfist - January 5, 2016, 12:52 pm

add me on skype: dekaronexo

?Enlightened - January 6, 2016, 7:44 am

Simple solution.

Create your stub, go to crypter, change the img and file type. Make sure it's done in crypter (or keylogger if it is not compatible) and experiment what gets the 0/40, as some combos will and and wont work
