Thread: [Koi to Senkyo to Chocolate](#)

Quote:In Japan, participation in extra-curricular activities is as fundamental a part of an education as chalk and gym shorts. However, not all students are overachievers, and for those like Yuki Ojima, groups like the Food Research Club are welcome havens in which to slack-off. But what's a slacker to do when the radical new candidate for Student Council president announces her intent to get rid of clubs like the FRC? Well, getting the help of the current Student Council president is a good start, but HIS suggestion is so counter-intuitive that it's crazy: Yuki should run for the Student Council himself? And yet, it's SO crazy that it just might work! Especially when Chisato, the chocolate-adverse president of the FRC (and Yuki's best childhood friend,) and members of other targeted school clubs start to join the swelling FRC army. But can this army of goofs and goof-offs coast all the way to political victory? Or will someone have to step up to the plate and take one for the team? 1 Season, 12 Episodes + 1 Special.

Underrated Anime if you ask me. It's sad that it only have one Season, as I could really see a second one that would occur after the elections. I added this Anime to my list after seeing it mentionned in a thread here, and it took me a while to watch it, but I really don't regret it. Although I regret the fact that there's still a lot of questions that are left unanswered, and I'm wondering if I could find answers to these in the Manga.

Watched it, loved it would like some more of it. Amen.

"still a lot of questions that are left unanswered."

I feel you. I want some dang answers.

Solid anime. I personally like it. It has a cheesy plot though.

Let's say if someone read the Manga and can tell us if we could find the answers to our questions there.
