THE DIAMOND PACKAGE

My Best HackForums eBooks Packaged Together
(Even my private and discontinued ebooks)

Why Am I Doing This?

I am attempting to bring an entire new standard to HackForums when it comes to ebooks. I am in the works of my two greatest ebooks of all time. Ones that will provide life changing incomes (yes incomes) to people. In the process of doing so i've decided to package ever ebook i've ever sold on HF and make it affordable to anyone.

When I First Started Implementing These Methods In October 2015

February 2016 - Bought The Car I Had Set As A Goal!

On October 10th I remember writing the goal of getting this car:
(customized the rims and exhaust ?)

Whats In The Diamond Package V2?

[NEW! The Target Machine System - Truly Automated Income](#)

25 pages of in-depth training with screenshots teaching you how to build a fully functioning autopilot income machine the same way the professional do it. Not with some little 'trick method' rather a legitimate business model backed by data.

[*PRIVATE & DISCONTINUED* The Freelancer Blueprint - 4 Figures Monthly Within 30 Days](#)

My most in-depth and unique ebook out. Showing the thing that 97% of people screw up. In The Freelancer Blueprint I layout a step by step system to get high paying high quality clients coming to you!

[*PRIVATE & DISCONTINUED* REAL CLIENTS REAL INCOME ZERO WORK? MAKE \\$X,XXX/MONTH WITH EASE!](#)

Less than 20 total copies ever sold, this was kept very private and eventually I closed sales due to buyers wanting it to remain private. This shows you a legitimate business model that is high in demand, requires very little work, and fills a need for many online businesses.

[The Social Blueprint - Earn With Freshly Made Accounts](#)

To date this is the best ebook i've put out. Shows you an incredibly unique method to start pulling in \$20+/day within hours of purchase. I even show you a no excuses method to grind out more money when you need it. I then end with showing you how to scale and make it autopilot. It's honestly something i'm fairly proud of creating I know you will enjoy it!

DO NOT Close This Tab Looking For an Easier Way Or a Shortcut

For as much as a coffee and snack you can change the course of your 2017. You can make it the year you're finally not broke. Or you can close this tab and continue looking for an easier and free method. IT DOES NOT GET EASIER THAN THIS.

Nobody Works Harder to Make Sure You Succeed. Let's do this together!

A very nice and pretty unknown method, which will allow you to make some extra money on the side autopilot. You can of course also scale this up and make more money, there are pretty much no borders.

The Pyramid Profit System

This method is more known I think, however Yous has some special ways to make you more money and the best thing: It is really autopilot. It requires some work to set up, but the invested time will give you more money at the end of the month, so it is worth it. I bought the old version some time ago and stopped doing it, however I still get ~\$30 per month really doing nothing and I think I will scale this up now.

Real Clients Real Income

With that book you can build a business, which can make you really good money. It also takes some time to set it up, but once you are done you will have paying clients paying you \$100/month for 2 hours of work. As this "work" is pretty easy, you can also hire someone to do it for you. I would consider it semi-autopilot, because everytime you have someone working for you, you need some contact with him. This shouldn't take longer than 2 hours/month.

The social blueprint

Another genius method to make some extra money. I haven't tried this method so far, but I can tell that you will make some money with it, simply because you offer something to your clients that they can't say no to. This method can also be automated by hiring people, so you have time to scale it up.

Conclusion

This package is definitely worth the money. You obviously can't make \$10,000 in one night at the beginning, but every seller who promises this is just stupid. If you could do that, you could also just hire 10 people to do the work for you and make you rich.

However, this package will not only make you some extra money, it will also inspire you and that alone would be a reason to buy it. Your methods are more of building a small business which is great, because that is what earns you the most money. The methods take some time to set up, but it is really not that much and I think every money making method takes this time. There are also eBooks charging you \$35 and then only tell you how to set up your CPA account, so this price is really fair..

If you still don't know whether to buy this package, read your other threads, they should prove that this package has a high quality.

Please clarify this for me, Does discontinued mean it doesnt work anymore?

So out of the 4, 2 dont work and 1 is about making a system autopilot.. so we'll get 1 method for making money? (Social blueprint)?

Thanks

I'm a bit confused by your question ?

All of the methods work and they're my private methods.
