Synopsis

Ajin are humans that cannot die. Seventeen years ago, they first appeared on a battlefield in Africa. From then on, more of their kind are discovered within the human society. Their rarity in appearance means that, for experimental purposes, the government will generously reward anyone who captures one. In the present day, for what a certain high school student expects to be a typical summer holiday, his life is about to turn unexpected...

What?

its eng subbed ! i watched it on kissanime .

CorrosiveBlueberry - January 15, 2016, 11:08 am

Part 1 and Part 2 are available (nyaa.se) fan subbed.. However it is a 3 part movie, and the series comes out today i believe (1st episode); i'm avoiding the movies because i'd rather watch the series i think. I mean you could either watch the movies or the series if you watch both youll probably be bored

neightworks - January 16, 2016, 1:06 am

Holy shit what did I just watch? Those awful subs and wtf is with the animation?

I will be waiting for better subs to be released and wait for better quality video.

That animation was fucking horrible and the subs actually gave me a good laugh.

CorrosiveBlueberry - January 16, 2016, 6:47 am

I really hope anime doesn't all go to CG; very few shows are tolerable in CG to me (Arslan senki was 1 because it barely relied on CG in my opinion), Shows like Kingdom the CG could kill you lol. However the storyline to that show seems real good.

I'm avoiding it until different fansubs come out, here's some quotes from what people sent me:
"I not remember something that happen long ago", "it's time drawing blood", "Blot the mail Kaito-kun", "Why do not you go?", and "Go are beautiful". There's probably more like that but that's I was sent.

Story sounds good, too bad this animation is balls.

Thats CG for you

TwiizuhL - January 17, 2016, 10:29 am

art and animation is pooppy the plot and everything else looks good but yeah

CorrosiveBlueberry - January 17, 2016, 11:33 am

Better sub-group picked it up then "Shiite-subs" lmao finally [FTS] , it isn't unbearable broken english anymore lol. anyways the CG isn't so bad could be alot worse like Kingdom, so far i like episode 1

Hunting Rifle - January 17, 2016, 1:42 pm

So what 'real' group is actually doing this horrible CG mess?

CorrosiveBlueberry - January 17, 2016, 2:06 pm

[FTS] ; is the copy i got that is pretty good / english isn't broken at all like any of the other copies. When i looked up FTS on nyaa now though FTS stands for free time subs and that groups only subbed like 2 shows and i'm not sure but it looks like the upload for Ajin episode 1 they posted is gone now; i still have episode 1 by them already on my hard drive. They did some quality subs

better than all the other copies on nyaa or anywhere; lol all other copies so far are pathetic. And idk if any real group / popular groups is planning to pick it up, netflix is the only one with licensing rights and won't sub it / release sub world wide until series finishes airing entirely so it'll be atleast another 12 weeks until we have the OFFICIAL subs.

hopefully fan-subbs come each week

Although i'm not sure if FTS stands for free time subs or a different group because when looking at their website they say they don't translate; only edit streamed subs like netflix, crunchyroll etc.

Lord Bendtner - January 17, 2016, 4:03 pm

After reading the manga i was really looking forward to the anime. That is, until i found out it's CG. This is a load of shit.

Stella Vermillion - January 17, 2016, 4:21 pm

I downloaded it but didn't get to watch it yet, so far from reading the pages I'm not looking forward to it :/

Lyrlei - January 17, 2016, 6:03 pm

its pretty good despite the cg, def watching it.

Realizm - January 18, 2016, 1:23 pm

Started to watch it, the CG for me is somewhat bearable, but the subs were deadly lol. I'll be keeping my eyes out for any decently subbed version as I'd like to at least give this a chance, even with the animation being the least favorite I've seen so far.

BlakkHeart - January 18, 2016, 6:24 pm

amazing. i feel like if this wasnt CGI animation it would be one of the best anime this year but i still like it regardless

Govak - January 25, 2016, 2:56 am

Too bad that the anime series is just the movie split up into episodes. And you may also notice that the animation can get a bit choppy sometimes...

neightworks - January 25, 2016, 5:57 pm

So much potential wasted.

Peanut Butter - January 29, 2016, 4:50 am

Started watching it yesterday, it's decent. Better CGI would've helped this show a lot but it's tolerable.

Chips Ahoy McCoy - April 3, 2016, 9:32 pm

It has been a decent watch so far overall. Not amazing, but pretty enjoyable. I'm sure i'll end up disliking it by the end though. I can tell how it's going to end at this point and i don't really like that route.

Spoiler ([Click to View](#))Woوو giant attack on this government building. And now suddenly Ajin are accepted in the entire world. Wait, what? literally nothing works that way. If anything, that'd make the world hate them even more.

skelly76 - April 3, 2016, 11:11 pm

Cool plot, I'm guessing a few episodes are out by now. I'll put it on my list.

Hi I'm Agreeable - *September 2, 2016, 7:06 pm*
