Thread: [Have paid eSports Logo, just need some designs made out of the Logo](#)

InfamyHALO - January 6, 2016, 4:15 am

EDIT: Guess this is the wrong section, just found the Graphics Market section. Well if anyone here in this section sees this just let me know!

So awhile back I bought paid graphic design work for my CSGO team and it came with several different forms of the logo + two watermarked examples of what can be done with the logo IF EDITED (essentially adding a background and drop shadow from what I can see).

Sadly, I'm semi-retarded when it comes to graphic design.

I'll provide the logos and then the examples that I need recreated.

So basically you'd be taking the logos and recreating the watermarked samples I will provide for you.

Just comment on here if you're able to do this, it shouldn't really take that long from what I can see.

Thank you!

ALSO AS A BONUS: If you could create avatars that would fit for Steam that are kind of multi-colored that'd be amazing, for example Cloud 9 took their original logo and added different color backgrounds to the logo itself (purple, green, yellow, etc.). If anyone can replicate that with my logo I'd pay more:

[img]http://ytimg.googleusercontent.com/vi/t5cs_9ZUycw/mqdefault.jpg[/img]

It's small but it's all I could find on Google images. As you can see on the right, they have the C9 logo but with different color backgrounds and all that.

We can discuss that if anyone wants to take on this quick project :)

?onday - January 6, 2016, 4:29 am

We can do this.

Please add us on skype @ ImperialDesigns to discuss, but it may not be until later today when we get to designing it.

Thanks!
