8. END

INTRODUCTION Alright everyone. Welcome to the ULTIMATE DEFACEMENT GUIDE. You probably may be thinking, "Wow this thread is just pointless." Well, today we will be covering the entire corner of exploits, compiling, shells, and etc. This will definitely not be a waste of your time, I promise, if you are new at this, you will learn something from this tutorial. So lets begin shall we?

WTF Is this "Defacement" everyone talks about? Basically, they are referring to defacing a website by finding an exploit to gain access to their admin panel. Once they have access, they proceed to upload their shell. Which we will cover later on. Now, the person has uploaded their shell onto the website, which then displays the defacement or etc.

Now that you know what the term "Defacement" is, and you have a good idea of how the "hackers" do it, you probably are thinking, OKAY I WANNA DO THIS! Umm, no. There is quite a bit more you need to learn before we begin.

Three MAIN Methods for Exploiting

The following are some of the most popular ways of gaining access to your victims website.

SQL Injection - SQL injection is an attack in which malicious code is inserted into strings that are later passed to an instance of SQL Server for parsing and execution. Any procedure that constructs SQL statements should be reviewed for injection vulnerabilities because SQL Server will execute all

syntactically valid queries that it receives. Even parameterized data can be manipulated by a skilled and determined attacker.

The primary form of SQL injection consists of direct insertion of code into user-input variables that are concatenated with SQL commands and executed. A less direct attack injects malicious code into strings that are destined for storage in a table or as metadata. When the stored strings are subsequently concatenated into a dynamic SQL command, the malicious code is executed.

The injection process works by prematurely terminating a text string and appending a new command. Because the inserted command may have additional strings appended to it before it is executed, the malefactor terminates the injected string with a comment mark "--". Subsequent text is ignored at execution time.

Want to use this method? Go here: <https://hackforums.net/showthread.php?tid=45621>

Cross Site Scripting - Cross site scripting (also known as XSS) occurs when a web application gathers malicious data from a user. The data is usually gathered in the form of a hyperlink which contains malicious content within it. The user will most likely click on this link from another website, instant message, or simply just reading a web board or email message. Usually the attacker will encode the malicious portion of the link to the site in HEX (or other encoding methods) so the request is less suspicious looking to the user when clicked on. After the data is collected by the web application, it creates an output page for the user containing the malicious data that was originally sent to it, but in a manner to make it appear as valid content from the website. Many popular guestbook and forum programs allow users to submit posts with html and javascript embedded in them. If for example I was logged in as "john" and read a message by "joe" that contained malicious javascript in it, then it may be possible for "joe" to hijack my session just by reading his bulletin board post. Further details on how attacks like this are accomplished via "cookie theft" are explained in detail below.

Want to use XSS? Go here:

<https://hackforums.net/showthread.php?tid=280081&highlight=XSS+TUT>

RFI - Remote File Include (RFI) is an attack technique used to exploit "dynamic file include" mechanisms in web applications. When web applications take user input (URL, parameter value, etc.) and pass them into file include commands, the web application might be tricked into including remote files with malicious code.

Almost all web application frameworks support file inclusion. File inclusion is mainly used for packaging common code into separate files that are later referenced by main application modules. When a web application references an include file, the code in this file may be executed implicitly or explicitly by calling specific procedures. If the choice of module to load is based on elements from the HTTP request, the web application might be vulnerable to RFI.

An attacker can use RFI for:

- Running malicious code on the server: any code in the included malicious files will be run by the server. If the file include is not executed using some wrapper, code in include files is executed in the context of the server user. This could lead to a complete system compromise.

- Running malicious code on clients: the attacker's malicious code can manipulate the content of the response sent to the client. The attacker can embed malicious code in the response that will be run by the client (for example, Javascript to steal the client session cookies).

PHP is particularly vulnerable to RFI attacks due to the extensive use of "file includes" in PHP programming and due to default server configurations that increase susceptibility to an RFI attack ([4,5]).

Go here to learn RFI:

<https://hackforums.net/showthread.php?tid=369913&highlight=rfi+tut>

Alright now that you have learned the 3 TOP methods of hacking, lets move on to the next step.

Once You Have the Admin Password

Alright, we are excluding the other 2 and going to be using SQL Injection as an example since it shows off the best example. You Now have the admin username and password, and you have decrypted it. (We will cover this later) You are ready to login and upload your shell! First you will need to find the administrator panel login. You can search around on HackForums for some useful tutorials on how to find the administrator panel quickly.

Once you have found the correct page, login with the details. If everything works, Grats! You are ready to upload your shell. Now we must create our code. This is where the main part of the tutorial comes in to play.

Compiling your Code

So you see all these epic deface sites, with these awesome skulls and music. And your asking HOW DO I DO THIS?!?! Well here is your answer. In order to do this, you must have some knowledge of HTML, as that is the default programming language I will be using. I also suggest that you join a defacement team, or ask a friend if they can provide you with a code you can upload. If you are clueless or just lazy, you can find an awesome application that can generate a random code for you! Link: <https://hackforums.net/showthread.php?tid=456483>

Uploading Your Defacement

Now that you have generated your code, you have it saved, and edited. Make sure to change to an .html file, or else it wont work on Firefox, Safari, GC, etc. Open up FileZilla, or your favorite FTP and connect to the FTP host which can usually be found somewhere on the website cpanel. Upload the file to public_html and make sure you delete are the other files (optional, helps protect you from getting traced). CHMOD the permissions, and then close out. Head on down the directory on which you installed the file, and you should see your deface page! Grats! You have successfully taken down a site.

Shells

I recommend this to advanced members. If you are an advanced defacer and would like to know how to upload shells on vulnerable sites please go here:

<https://hackforums.net/showthread.php?tid=482330&highlight=shell+tut>

Useful Tips

Selecting a good Proxy

Before you even think about defacing a website, please download a dedicated proxy/vpn. I recommend [censored] VPN. <http://www.cyberghostvpn.com/> Make sure this is RUNNING AT ALL TIMES. I CANNOT STRESS THIS ENOUGH. The last thing you need is to go to jail for a few years because you did not mask your ip.

Prepare Yourself

Are you ready to actually hack someones website, destroy their content and upload a shell onto their webhost. Please ask yourself these questions before you continue. Clarify it with yourself, that you are doing something that is illegal and there is a chance you will be caught.

Decrypting

Most of the Passwords you find in SQL Injection will be an MD5 Hash and will sometimes be impossible to decrypt without the help of a skilled hacker or friend. Don't be afraid to ask on the forum for help with your crack! If you need help decrypting, feel free to send me a private message.

END

Well, its time for me to say goodbye. I hope you found this tutorial helpful in many ways. Not only does it tell you specifically how to upload your code/shell, but it also gives a definition on all exploits possible. Thank you to all the HF members who posted tutorials to also help me backup this tutorial. Thank you to the maker of the shell tutorial, as that really helped me out a lot. I worked very hard on this tutorial and I hope you all enjoy it.

~Jaystar

Corrupt. - June 30, 2010, 8:42 am

Nice tut dude :) very detailed, cheers ?

RRRoooRRR - June 30, 2010, 8:46 am

Im liiking the layout lol

Thanks for sharing

-Chosen-

pimpim - June 30, 2010, 8:49 am

Very newbie friendly :)

I think this tutorial will give people new to hacking a kickstart into this wonderful world!

hahaha.lol - June 30, 2010, 10:03 am

That's a Awesome Tutorial!

Quite informative for beginners..You should have placed it in the Hacking tutorials Section for Getting more attention..

Nice way to start a new account...keep it up.

-Try to keep this thread alive for other's!

IAAAS - June 30, 2010, 10:04 am

wow dude nice tutorial! will sure be good for noobs!

Jewish - June 30, 2010, 10:43 am

very nice tutorial

-too short-

Naww - June 30, 2010, 12:24 pm

(Jun 30, 2010 10:52 AM)MøFø™ Wrote: [\[CITE\]](#) :Requesting Sticky for New Members to Learn:

Yeah I'm whit you man?, nice tut.?

????? - June 30, 2010, 5:34 pm

Man..Nice Tut, helped me alot and thanks for that..

ThuND3r_KiNG - July 1, 2010, 3:06 am

very nice dude thank you o_O

ManUnited - July 1, 2010, 8:59 am

Hello there I have a question is the [censored] good to use when using RAT ?

mattoni - July 1, 2010, 9:48 am

I liked it . thanks mate for tut

To The Limits - July 1, 2010, 10:09 am

Nice tutorial..with alot of usefull tips!! ?
thank's!

ManUnited - July 1, 2010, 10:18 am

(Jul 1, 2010 09:11 AM)MøFø™ Wrote: [\[CITE\]](#) Uhm, I would recommend it at anytime. [censored] is one of the best from what I have experienced.

Hi thanks ill try it out then :)

Hi so I just downloaded the [censored] VPN but there is a problem on the very last bit of the installation it's come up with my 'CMD' with a other box saying the following... The software you are installing for this hardware TAP-WIN32 Adaptor V9, has not passed windows logo testing then a bit saying Continuing installation of this software may impair or destabilize the correct operation of your system etc... then has options of continue anyway or stope installation any ideas on this ??

Lemonbud - July 1, 2010, 10:41 am

Does this work for forums too?

ManUnited - July 1, 2010, 10:41 am

Well I downloaded it by mistake but it came up error anyway and the devices were not installed right, something to do with administrative rights etc... is there a different VPN I can use other than this one that is good for RAT.

Jaystar - July 1, 2010, 11:01 am

(Jul 1, 2010 10:41 AM)Lemonbud Wrote: [\[CITE\]](#) Does this work for forums too?
Depends if that Forum is vulnerable.

(Jul 1, 2010 10:41 AM)Night Hacker Wrote: [\[CITE\]](#) Well I downloaded it by mistake but it came up error anyway and the devices were not installed right, something to do with administrative rights etc... is there a different VPN I can use other than this one that is good for RAT.

<https://hackforums.net/showthread.php?tid=74534>

I have left a comment in that thread already and have no help what so ever from it, so im stuck now to be honest as im guessing that you dont no which one will be good to use with the RAT other than the one downloaded from here of course etc...

CyberWorm - July 1, 2010, 12:48 pm

cheers m8, I'll learn from your detailed tutorial ;)

regards,
C-WR

Nicolai - July 1, 2010, 2:42 pm

Quotes fails on HF ? (So this post looks silly).

Anyway, you don't "compile HTML" or "compile php" ... (wtf dude?) And HTML isn't even a programming language.

And most important: YOU CANNOT DECRYPT A MD5 HASH!!! You can "crack" the hash, butNOT decrypt it.

Sho0ter - July 9, 2010, 10:38 pm

Nice tutorial with an awesome layout...

thnx for sharing

Keep going

Friedrich Schiller - July 10, 2010, 3:02 pm

Thanks bro

it didn't help me with my paranoia haha

s0ca - August 5, 2010, 6:33 pm

wow !!! very nice tut good job bro :D

kakijun - August 5, 2010, 7:21 pm

Awesome!

It's hard to find TuTs for Mac :(

hacc - August 6, 2010, 2:09 pm

I don't understand I thought you upload a shell to view a websites index page and then edit it.

Jaystar - August 7, 2010, 8:38 am

(Aug 6, 2010 02:09 PM)hac Wrote: [\[CITE\]](#) I don't understand I thought you upload a shell to view a websites index page and then edit it.

Like I said that was another method for advanced defacers.

ISO - August 7, 2010, 8:45 am

That's an excelent tutorial man , Thanks for this share !

CanAM - August 7, 2010, 11:49 am

bookmarked for my bored moments, ty.

KavalaRacer - August 7, 2010, 11:54 am

nice TuT really helpful...!...! thnx dude :P

Today - August 27, 2010, 7:32 pm

Very nice tutorial, great share. If I could rep you twice I would.

Strik9 - August 27, 2010, 7:38 pm

Gawd, I want to stalk you right now.. and do some pretty epic things to ya..

Great tut.

NaRTToTiK - September 9, 2010, 2:19 am

very nice tut .. thanks you very much!

AUTISMUS MAXIMUS - September 9, 2010, 4:46 am
gr8 tutorial u helped me vry much 10/10

spAb0k - September 9, 2010, 4:30 pm
thats awesome cool i want to be here in this thread always....to read this repeatedly and learn using those tuts thanks man!!

The Sil3nt - September 9, 2010, 10:20 pm
Yay i understand it totally. Thanks for The share.

pignose - September 10, 2010, 4:11 pm
thanks man! i needed that!

keep up the great work

elitejimmy - September 30, 2010, 1:05 am
really informative .. i am just gonna start website and forums hacking so this stuff really helps .

Superman™ - September 30, 2010, 2:59 am
Bo0kmarked...gud for a n0ob like me :)
Thanx !

loreja - October 8, 2010, 5:12 pm
Very nice tutorial
Very good

hacc - October 8, 2010, 5:27 pm
I'm sorry but if you already have Cpanel access, you can deface in like 5 sec.

Also, most sites you don't get cpanel access anyways.

hacc - October 8, 2010, 5:54 pm
(Oct 8, 2010 05:36 PM)Wolvie Wrote: [\[CITE\]](#) I was merely giving an example regarding the the Cpanel access.

And I have gotten CPanel access to a ton of sites, lemme know if you want proof.
So have I lmao, but for every 100 sites I've hacked, I've probably gotten about 10 cpanel access, which isn't much.

And your pictures and stuff are based off using cpanel which is lame because hacking from cpanel is like uploading a shell from a shell.

nightlight - October 12, 2010, 5:28 pm
Thank you so much for this walkthrough

helpa1 - October 12, 2010, 10:46 pm
mac users are ftw
what type of mac u got

A32 - October 13, 2010, 9:12 am
Nice tut, but you only tell about SQLi, RFI, and XSS.. Wheres LFI? ;D

Jaystar - October 13, 2010, 3:54 pm

(Oct 13, 2010 09:12 AM)A32 Wrote: [\[CITE\]](#) Nice tut, but you only tell about SQLi, RFI, and XSS.. Wheres LFI? ;DI left LFI because it is a lot less common then these 2.

I believe there are a few LFI tutorials around here if you use the search tool you may find one.

(Oct 12, 2010 10:46 PM)helpa1 Wrote: [\[CITE\]](#) mac users are ftw what type of mac u got MacBook Pro with Snow Leopard. But I have my hard drive partitioned for windows as well.

AlleniumxD - October 13, 2010, 4:59 pm

I love your tutorial. It was very in-depth and easy to read. 10/10 for the overall content.

devnull - October 13, 2010, 7:24 pm

thanks for the share dude :)

Foxaris - October 13, 2010, 8:04 pm

Very good tutorial. I just downloaded CGVPN, I definety needed that.

Just about to check the xss tut, i know it, and i think i`ve seen all the ones on HF, but imma check dis one out too :D

Thx m8

evilwcownz - October 13, 2010, 8:42 pm

oh good job m8 , i just downloaded.

Toxic Waste - October 14, 2010, 12:59 am

Very sexy layout, nice tutorial :)

Invisiblekid - October 19, 2010, 11:00 am

very nice tut was very usefull for me thanks

Substance - October 19, 2010, 8:06 pm

Very nice tut im a newbie myself and i found it very useful :D

Ankush - October 19, 2010, 10:05 pm

Nice tutorial man....keep up the gud work..thanks

superactive - October 19, 2010, 11:45 pm

thts awesome.. but definatly needs practice

ISTRIKEYI - October 27, 2010, 12:04 pm

Thanks bro for this awesome TuT im gonna try it out :)

StEp Up! - November 4, 2010, 12:44 am

very nice tut thanks mate..

paganxxxpride - November 8, 2010, 12:50 pm

awsome tut dude.realy helpfull and like you said it is not a waste of time at all.it realy helped me understand more about defacing.thanx bro keep up the good work!

The Dane - November 8, 2010, 4:20 pm

Just what i was looking for mate, THX!

Grammar Rays - November 9, 2010, 2:43 pm

Bookmarked, I'll read it later, I'm going for a pee now lol. :)

vandan - November 9, 2010, 6:07 pm

This Is Awesome & Very Nice & Helpful Tutorial.

I Really Thank You For Sharing.

Get off my thread, you're not welcome here.

Altus - December 18, 2010, 11:22 pm

Why not? Because I pointed out flaws in your shitty tutorial? And its funny that you minus repped me, who cares about that? Lol

Pakistani Hacker - December 18, 2010, 11:31 pm

Nice tut but i already knew it

jake2891 - December 19, 2010, 12:50 am

is tor better for anonymity than [censored]?

pwntoken - December 19, 2010, 12:59 am

Good Guide...gotta appreciated the time he has to take to write this Quality thread....
by the way reduce the font size !

Sculptor - December 19, 2010, 5:24 am

great tutorial... it will help a great deal those who want to learn defacing...

nice tut.

Jaystar - January 5, 2011, 10:23 am

Thanks to the people to truly appreciate the fact that I wrote this tutorial.

b0lt - January 5, 2011, 10:46 am

Nice TuT man I really enjoyed it ?

pkerking - January 5, 2011, 11:26 am

Nice tut mate keep it up hope to see a sexier tut in the future

axmetmcl - January 5, 2011, 12:24 pm

its very high detailed and perfect tut dude. thanks so much.

pR0gram_!ST - January 5, 2011, 12:44 pm

Good job!

Just one objection, I think the title "Compiling your Code" is not relevant, when I saw "compiling", was expecting to read something else.

"Generating your Code", will be more related to what you speak.

Thanks!

Jaystar - January 6, 2011, 11:25 am

(Jan 5, 2011 01:44 PM)pR0gram_!ST Wrote: [\[CITE\]](#) Good job!

"Generating your Code", will be more related to what you speak.

Thanks!!I'll go ahead and edit that when I get home.

Thanks for the feedback.

DFTCHE - February 5, 2011, 10:16 am

Thank you very much for tut. I learned alot.

Jaystar - February 7, 2011, 10:15 pm

(Feb 5, 2011 11:16 AM)McAdam Wrote: [\[CITE\]](#) Thank you very much for tut. I learned alot.Anytime. You're very much welcome.

CyberM@X - February 8, 2011, 12:55 am

Wow ! really love this tut ! <3 great work :!

Vouch from me :D! - learnt a bit here my self about XSS & RFI

Regards,

layout : 10/10

grammar: 10/10

overall understanding: 8/10

savhacks - February 8, 2011, 1:46 pm

A nice/easy to follow guide!

thanks;)

and usefull of course:D

Forrank - February 8, 2011, 3:17 pm

Nice tutorial :) thanks for sharing.

Legit\$hit - February 8, 2011, 7:13 pm

Hmm can you add on me msn, be my personal teacher : D anyone nice

cr4nkd4tsh1t@hotmail.com

Jaystar - February 22, 2011, 10:45 pm

(Feb 8, 2011 08:13 PM)Legit\$hit Wrote: [\[CITE\]](#) Hmm can you add on me msn, be my personal teacher : D anyone nice

cr4nkd4tsh1t@hotmail.com I accept payment via paypal.

\$15 an hour for private lessons.

Idc - February 22, 2011, 11:20 pm

This is okay <3 i think you skipped some things, but all in all, okay <3

lamezz - February 22, 2011, 11:27 pm

Nice and full tutorial...

Btw you r a proffesional teacher??

Jaystar - February 22, 2011, 11:33 pm

(Feb 23, 2011 12:27 AM)lamezz Wrote: [\[CITE\]](#) Nice and full tutorial...

Btw you r a proffesional teacher?? I wouldn't say professional. But I can do organized private lessons on a schedule.

Diazepam - February 23, 2011, 12:23 am

Nice guide man, should help lots of people.

Thanks <3

Matthew 6:33 - February 23, 2011, 1:52 am

cool tut man very detailet

musculaire - February 23, 2011, 3:30 am

Very good tutorial, bookmarked

autorunman22 - February 23, 2011, 8:29 am

OP, how would you know if the hash is md5 or sha1 or something? Can you give us a clue how?

chand197 - February 24, 2011, 5:19 am

thank you imma save this to my favorites

Codevade - February 24, 2011, 5:22 am

very nice tutorial i will be using soon.

Jaystar - April 3, 2011, 9:23 pm

(Feb 24, 2011 06:22 AM)codevade Wrote: [\[CITE\]](#) very nice tutorial i will be using soon.
Thank you, I hope everything worked out for you.

maizillo - April 3, 2011, 10:25 pm

Great tut.. thanks for sharing

im abcd - April 3, 2011, 11:00 pm

excellent tut bro ..thanks !!

?Dante - May 11, 2011, 8:59 pm

awesome awesome awesome ?...tut dude,,,,greatly appreciated? (Feb 23, 2011 09:29 AM)
autorunman22 Wrote: [\[CITE\]](#) OP, how would you know if the hash is md5 or sha1 or something? Can
you give us a clue how?
hi autorunman22,
MD5 password looks like this-
"e10adc3949ba59abbe56e057f20f883e"

?

asifali2000 - May 12, 2011, 2:24 am

nice best tutorial it will help me a alot

lolalu0 - May 12, 2011, 2:33 am

Very Nice tutorial ;)
good layout :)

What about Lfi ? :d

mayee.28 - May 12, 2011, 9:46 pm

Good job Bro!!!

Nice One very useful for new comers!!!

Keep going !!!

Jaystar - May 14, 2011, 11:00 am

Thanks everyone! I appreciate it.

conan_1 - June 26, 2011, 3:58 pm

Just AMAZIING
Nice work, hope you'll come with anothers !

BrothaMike - June 26, 2011, 4:01 pm

this is what im looking for ;D
and i finally found it,.. THANK YOUU

P-Kito - June 26, 2011, 4:47 pm

I like the part "Prepare yourself" :)

Greetings

tnek06 - June 26, 2011, 6:19 pm

nice tut mate ,keep on sharing .. cheers!!

Jaystar - June 26, 2011, 8:36 pm

Updated with poll. Check it out.

Hennon - June 26, 2011, 11:42 pm

Nice, easy, and thorough guide. Much appreciated.

10/10

Dimitrije - June 27, 2011, 6:03 am

Very nice and HQ tut, thans. But I have one question, what you do with website that don't have any admin page?

Hifonics - June 27, 2011, 6:44 am

nice tutorial, but you didnt showed uploading a shell and so.

what if there are no ftp datas on cpanel?

Jaystar - July 14, 2011, 5:48 pm

Thanks everyone. I appreciate the support.

mayee.28 - July 20, 2011, 6:34 am

Nice one mate !!!

Keep going !!!

Have a happy hacking !!!

???

Jaystar - July 25, 2011, 10:51 pm

Thank you for the support.

fiyahz - August 28, 2011, 9:20 am

Nice tutorial. Learned the basics of this :D

Aclamation - August 28, 2011, 11:20 am

Nice tut man, helps so much, very detailed

noober1001 - August 28, 2011, 11:36 am

Nice detailed tut bro.

Thanks for this.

Jaystar - August 28, 2011, 4:31 pm

No problem guys. Anytime. If you need further help, let me know.

hyphy1337 - August 28, 2011, 5:56 pm

Very nice tut man i would recomened expanding on the proxy a bit some people can tend to skip it over or get one that is not secure.

Mabey include somthing about Proxy vs. Vpn and what could happen if you dont use one.

cheers ?

Dark Aveng3r - August 28, 2011, 9:11 pm

good one...:D

[short message minimum 50]

Ledara - August 28, 2011, 9:12 pm

Decent tutorials however could use a lot of work. Way to many "we will go over this later" and just search the forum. Still though very HQ

The Ion - October 21, 2011, 1:07 am

nice one keep up the good work homie :D

Ekoplex - October 21, 2011, 4:16 am

Been looking around for a tut like this for a while, Thanks"

Jaystar - April 17, 2012, 3:53 pm

I'm going to be redoing this next week or so. I'll organize it a bit better and add a bit more information to the subsections, along with multiple corrections. :)

sl4sh3rz - June 11, 2012, 6:52 pm

thumbsup t0 y0u dude. . . This tut help the begginers.
thumbsup t0 y0u dude. . . This tut help the begginers

kray - June 11, 2012, 8:01 pm

What a detailed, and concise guide. Thanks.

soicalboy - June 12, 2012, 2:32 am

Looks really kool!
I just had a quick read and liked it!
Thanks!

~Me

albdevil - June 12, 2012, 3:23 am

Man..Nice Tuto thanks for that.. a lot

Dynasty@HF - June 12, 2012, 3:41 am

good tutourial for begginners like me to read through. if it wasnt for posts like this on the site beginners wouldnt be able to begin.

Thanks ?

Th3PonyWizard - June 12, 2012, 4:05 am

RFI is a dying method. allow_url_include is disabled by default since PHP 4 dot something. You would barely find these servers at those days. Basically, it's a nice tutorial, but it tries to cover up too much in a little wall of text. There are lots of other ways, and lots of stuff to include. I'll probably post something similar when I'll have time.

Good job, Overly ^3^

Injector - June 12, 2012, 5:20 am

Wow, this is absolutely an amazing tut

thanks for this

asterionzod - June 12, 2012, 6:46 pm

Many thanks for taking the time to make this guide.?

Jaystar - June 19, 2012, 10:41 pm

Thanks everyone. I realize RFI is dying and a couple things are starting to get outdated. Like I stated earlier, I plan on going through everything and updating it, adding more information and cleaning it up to make it much more organized for you all.

I've just been extremely busy recently. I'll get around to it eventually. Thanks for all the support and as always, PM me if you have any questions. If you're still waiting for an answer, shoot me another PM and I'll try my best to get back to you asap.

Cheers.

? ? ? :) ? ? ? ? - July 18, 2012, 10:49 pm

thank you for this helpful very helpful.

ajkaro - July 19, 2012, 2:40 pm

good tutorial for beginners like me :)

Dankrupt - July 29, 2012, 9:23 pm

really loved how detailed and helpful this tutorial was, loved the visual of it too helped me out alot.

newestmemberhere - August 26, 2012, 8:45 pm

thanks very much man, well written and easy to understand.

kirkjavier - August 26, 2012, 11:19 pm

nice thread very useful. :)) thanks

sidney - August 27, 2012, 12:08 am

Thanks you very much, i use that when i need it

tyty51492 - August 27, 2012, 1:03 am

very good read thanks for the info man

Bigbawasz - August 27, 2012, 9:06 am

Nice tutorial dude =)

Thank you =)

Spoiler ([Click to View](#)) Message is too short

Nick Automatic - January 1, 2013, 8:50 pm

Very good for a neophyte like me . Thanks ! ?

H3LP - January 1, 2013, 10:09 pm

Cool tutorial, this should help some people just starting out. :)

millsy102 - March 24, 2013, 7:35 pm

Love the vouch !! worked amazingly. love the tut

Gangnam - March 24, 2013, 8:44 pm

Nice tut helped me a little... its very noob friendly

Huziwara - March 25, 2013, 2:54 am

This tutorial is very complete, which is perfect for a beginner !

Also the links help too.

Thanks a lot

nfasi08 - March 25, 2013, 5:04 am

very nice tut bro! it helped me a lot!

Dexter ? - July 26, 2013, 10:15 pm

Thanks, this helped me. Props for putting in the effort.

adzon - July 27, 2013, 3:23 am

Thanks for share.

help me a lot.

o_O

DrWhat - July 27, 2013, 3:31 am

RFI is gone and dead, why to people still reference it.

Meechy Darko - July 27, 2013, 3:34 am

(Jul 27, 2013 03:31 AM)DrWhat Wrote: [\[CITE\]](#) RFI is gone and dead, why to people still reference it.
People aren't referencing it.

You just happened to grave dig a old thread that had something about it, in it.

Jaystar - July 31, 2013, 4:54 pm

(Jul 27, 2013 03:34 AM)kayy6688 Wrote: [\[CITE\]](#) People aren't referencing it.

You just happened to grave dig a old thread that had something about it, in it.

Right you are. This is a very old thread with outdated information. I plan on revamping this entire thread this week with new information and what not.

So stick around people.

QuickStar - August 1, 2013, 7:59 pm

Thanks for this, it will teach me a lot.

Pokestar - August 4, 2013, 8:48 pm

Wow thanks for the guide helped much!

Flaaffy - August 11, 2013, 2:53 pm

(Aug 11, 2013 02:42 PM)Legend Tube Wrote: [\[CITE\]](#) Very nice dude! thank you ;)

- Legend

dont old threads. there is so much wrong with this thread xD

compiling HTML xD

Jaystar - April 23, 2018, 4:54 am

Holyshit, I was a complete noob when I wrote this and around 11 years old. I'll revise it sometime later today.

Sorry to grave-dig, but I couldn't help but point it out. Not too bad for being so young tho, no? I will edit this later on once the thread has been updated and actually provide you guys with some more updated methods and easier ways of doing this.

2xqz - May 21, 2018, 9:03 am

Thank you for this great tut, it's so useful :)

Jaystar - May 23, 2018, 1:25 am

New update: should I leave this posted for those who are newer to defacement or should I update this to 2018 with better methods or let it be?

itsMeCherry - May 23, 2018, 2:21 am

(May 23, 2018 01:25 AM)Jaystar Wrote: [\[CITE\]](#) New update: should I leave this posted for those who are newer to defacement or should I update this to 2018 with better methods or let it be?

Update it man, why not ?

tyde - May 23, 2018, 4:18 pm

update it please. good methods there but surely there is more up to date methods?

Jaystar - July 17, 2018, 12:22 pm

Re-writing this tonight/tomorrow with updated methods for 2018 and adding a better layout.

Thanks for your patience.

Jaystar - August 26, 2018, 11:18 am

Why was this removed from my thread list via my profile?

EDIT: Nvm then, was only showing like 5 posts from me....

Tyr - June 13, 2024, 11:56 am

For a post that was created by someone in 2010 without any education this ain't half bad lil man ;)

2639996724 - June 25, 2024, 11:28 am

Thank you for sharing

randomonlineuser - February 4, 2025, 11:16 pm

This is actually quite good. Cheers mate.

Tyr - March 22, 2025, 12:20 pm

Very good guide but the green kills my eyes.

HappeningKaa - *March 22, 2025, 11:33 pm*

Great guide, much appreciation

zabazyept - *October 1, 2025, 2:17 pm*

saved

Sergiarr - *October 5, 2025, 7:57 pm*

nice bro

zakaria23 - *October 8, 2025, 3:40 pm*

thanks.

Tyr - *January 17, 2026, 3:06 am*

Huh. Looking at the stats and comments, I see people still venture here to view this despite the age. It is in need of a major update, not to mention the coloring. Perhaps it's something I can work on this month.
