Thread: [need a simple help to create a tab for mybb forum](#)

Burnzy - January 6, 2016, 6:53 am

so i got a plugin for mybb which adds tabbed menu, by default it looks like this

Spoiler [\(Click to View\)](#)

there is an option in cpanel where i can write a code to design my own tab style which looks like this

Spoiler [\(Click to View\)](#)

what i want to do is, like in the first picture make the tab look like the "my category" button bellow it, and to gently start fading when the tab is selected, thats where i need to put a code in selected tab style in the field below, it's not really needed but if someone can do that it would be great
thanks in advance for help!

You should post this in the Service Request section. By the way, just copy and paste the style from the button below, and for the style, it will require a bit of JS, nothing hard.

Burnzy - January 6, 2016, 9:30 am

if i knew how to do that i would not make a thread :D

Sakuto - January 6, 2016, 9:39 am

So I'm repeating myself, but you have to post it in the Service Request section, if you are not, you'll probably get the automatic 3 days ban for posting outside of the marketplace.
