Thread: [Need Support Cloning My C Drive To A New HDD.](#)

Narrate - January 6, 2016, 1:02 pm

Hello HackForums,

The title explains it all.

I have been trying to use Macrium Reflect to no avail.

Post here with your advice.

Use Acronis True image. I used it to clone 24 hdds for my brother's shop.

Pretty fast too and has a very friendly UI.

or google XML Drive Cloner. I remember using it once. Don't remember the results tho.

Have you tried restarting your modem?

I can't use Acronis True Image, it's cloning feature isn't enabled on the free version.

Vouch for this, Hex is a member of Null.

Narrate - January 6, 2016, 1:52 pm

Issue Solved.
