Thread: [PLEASE MAKE ME A PUTTY BOOTER](#)

ThePure - January 7, 2016, 9:07 am

I am very new to hacking and VPS But I really want to get a vps where it can run a putty booter and a VPN. I have a ddoser but I want one that hits hard and has unlimited boot time, same with the vpn, I want it to be reliable and fast. Someone please help me out, I'm really desperate. The host doesn't has to be a 5 star host I want it to be perfect for my needs. Im also on a tight budge :/ ?

DontQQSoMuch - January 7, 2016, 9:08 am

You have a ddoser? Whats that m8

If you ddos with your VPS it's very likely that it'll get suspended, right?

Duk. - January 7, 2016, 9:10 am

Okay, you want a vps that can DoS and have OpenVPN. Well, for starters, you can't really use both at the same time. The booter would fuck up your connection when you hit.

The ddoser/booter I use right now only has 600 seconds boot time and is really expensive for that boot time

UDP Flooder I presume, and what he's looking for is a host that doesn't suspend and can host a VPN for when he's not hitting maybe? Anyways, @OP I suggest looking more or less into a botnet that scans, and can host an IRC. As if you do that you can not drain the VPS's connection while attacking and still hit like a train if you get the right setup.

Aight, so you want to get a server that has spoofing enabled and DoS'ing allowed I'll check something for you quick brb

Moeseph - January 7, 2016, 9:45 am

You should message the users "Transe" or "Windows95" they should be able to help you out.

+1 10/10 would dos again

(Jan 7, 2016 10:47 AM)ThePure Wrote: [\[CITE\]](#) yeah idk how to do all that so I'm looking for someone to make one for me?

Yeah, if you have money I can help you lol it costs money to get the VPS(s)

PM me your funds, We can figure something out if you want.

EDIT: How much funds you have, how much do you want to spend? How much will you pay per month if possible?

Nobody's gonna make you something for free, what you're asking for isn't cheap. This isn't a charity. Fuck off and stop wasting people's time till you come here bearing funds.

Duk. - January 7, 2016, 9:59 am

That's why Im asking what his funds are. I'm working on my botnet right now and I'll let him help

and get bots if he has enough to pay for one or 2 servers.

I never said I wasn't gonna pay, I said I'm a budget and I have no knowledge about VPS so instead of being a prick why don't you help or gtfo out my thread.

Duk. - January 7, 2016, 10:06 am

I'm interested in that, but I just want to work on getting a DoS. Getting a DoS on a VPS Shouldn't be that expensive I believe because my friend use to pay \$30 a year for his :/

Yeah, I can get you one for that price but they all risk suspension, and DoS only things with no spoofing,etc. means that the router if it's not trash will block the attack ip then done.

ThePure - January 7, 2016, 10:09 am
