Thread: [VB.NET Torrent Client - TPB Torrent Search & Download](#)

Decim - January 7, 2016, 6:32 pm

[Video: <https://www.youtube.com/watch?v=liqkZgJZTZ8>]

Download link for the source code is in the description.

PS, sorry if I sounded drunk and/or stoned, the video was recorded at 4 AM.

I'll respond to any comments tomorrow.

You can download the source code from here:

http://www.mediafire.com/download/oqcxn5jzktlmly4/#+Desktop+Client+VB.NET_Arcanecfg.rar

Password: youtube.com/arcanecfg

For the Lazy ones. I'll post a VT in a second!

Edit:

Client.exe

SHA-1: 4483d36608ce05b332acb15f9b7ef0f15c374145337dbcf80e33b29e21f96911

Result: 1 / 55

Detection: HEUR/QVM03.0.Malware.Gen by Qihoo-360 but ignore it, its a stupid AV which detects nearly all programs written in .NET

The archive contains only the project files, no executables.

No real point in scanning it after compiling it yourself but thanks anyway.

Nice post built one myself using the famous instanceCount and getBetween functions to learn website scraping and was one of my first projects, never published it tho as my friend pointed out its easier to go to the website itself, wanted to implement a scanner so it has an actual use but never actually went thru with it

It actually contains the executable :) You haven't deleted all :P

There is allways one in /obj/Debug/ ;) Next time delete it aswell ?

There's also the possibility of hiding malicious code inside the source itself that's executed on debug. But you'd have to be pretty silly to attempt that in a coding section. ?

Not to be 'that guy' but is it really a torrent client? Its more of a torrent indexer that can start you're torrent client :P just saying

For what it does, I think it's okay to call it a 'client'.

But I see what you mean, maybe one day I'll implement a bittorrent downloader with it.

Decim - January 13, 2016, 6:08 am

Are there any bittorrent libraries for .NET that I am not aware of? The only one I know of is MonoTorrent but from their doc, it looks heavily outdated and doesn't seem to available any more either.

Yes, there is.

You can search for System.Net.Torrent on Google, and just press on the first result that comes up.

I had never heard of that.
I'll look into it, thanks.
