theres no ad blocker plus for cometbird
plz help

Cammy - January 9, 2016, 9:23 am

And what do you want us to do about it

blackmuggle - January 9, 2016, 10:25 am

some sort of magic
if you have the magic power

Cammy - January 9, 2016, 10:52 am

I'm capable of many things but in the end I'm not a wizard

blackmuggle - January 9, 2016, 11:10 am

i can think so to
but that don't mean i have to believe you :)

latyralus - January 16, 2016, 12:09 am

Here's some magic for you.

An alternative is to edit your Hosts file. The hosts file is just a text file with server addresses and IPs and you just change it to an IP that doesn't go anywhere (127.0.0.1). This will take effect in all browsers and apps no matter what you use.

Google "adblock hosts file".

blackmuggle - January 17, 2016, 9:06 am

what if i put all the host files from this site together into 1 file ?

<http://hosts-file.net/?s=Download>
