Thanks for the feedback!

Each project has it's own price, WhatsApp for example has a price of 0.6\$ / SMS.

If you buy 40 credits for 20\$ you're obtaining double the credits, as if you reduced prices to as low as 0.3 / SMS.

Might be offering coupons tho, will decide later.

Thanks again ^.^

This looks like a great service.

I understand the cost per sms but I am wondering if I can pay to use the SAME phone number.

If the social media account asks me to "re-verify" the phone number I originally used....will I be able to do that?

Thanks

I'm afraid not, but usually almost every social number lets you change the number to a new one.

But still, I can't find the reason they'd ask you to re-verify ?

Versa Life - January 9, 2016, 4:29 pm

Is this like 1 phone number per user? Or is it unlimited amount of numbers?

It's unlimited numbers per user. And you only get charged if you receive an SMS.

Currently we support only china as we're still in our launch phase.
We're adding US numbers in our next updates, hopefully this week.

US numbers will cost more.

I'll do a python tool for you, where you simply enter your OnlineSMSVerification.xyz token, and the tool creates WhatsApp Channels for you (username & password)

But you need HQ proxies so whatsapp does not ban your IP after creating so many channels.

which county does this support? is this real number?
i bought paid sms service in another site before but it was a virtual number and not worked well.

i want phone verification for yahoo, google, facebook and so on

Mike.Jinson - March 3, 2016, 6:29 pm

Will this work for other sites such as facebook etc and other forums?

Madam - March 4, 2016, 1:36 am

I create a new account and bought \$5 credit. i tested in google if it works fine. but google said like 'This phone number cannot be used for verification' whenever i retry. and it is generating only china numbers.

lol this service does not working at all, being failed even in facebook verification. And having only china numbers. google dose not accepting numbers from this service and i could not receive any SMS from facebook. I tried it out several times so far.

Please at allow me couple of minutes to reply. Sorry, I simply wasn't available.

Yes, you can use the numbers to verify WhatsApp, I even wrote an API for it, you can check the thread.

The numbers are private, once you use a number for a project, such as WhatsApp, no one else could use it for the same project again.

Currently our numbers are only from China. If you need a US number, I'll personally do it manually for you, as we still haven't implemented US API yet.

Again, sorry for the late reply.

Uber English is a service provided by uber that seems to send their SMS in another form than the usual Uber service.

If you need the normal Uber service, please use the Uber and not UberEnglish.

I'm afraid this functionality is not available currently, but we're working on it, hopefully in the near future.

I had issues where I wasn't receiving SMS from an account and after some troubleshooting we determined that my device was banned from sending out SMS. We spent alot of time going back and fourth through P.M and he stuck with me all the way. Really patient guy and I see that he has a vision with what he's offering. Good luck with everything even though I'm sure you won't need it

Does this work with Craigslist?

Game Changer - June 3, 2017, 3:07 am

Will it work for verifying gmail & Yt?

Of course it does!

Jin Goddo - June 4, 2017, 12:24 pm

Can you add private services? I have three apps I would love to have support for.

Pikachu - June 4, 2017, 12:31 pm

Service looks great, i tried to sign up on the site but every time i try to log in it says "Invalid user/Pass" and i know im using the right credentials cause i made the account recently with a password i wrote down, i was going to attempt to enter your App contest. Is this a common issue with the log in system? Or did something go wrong?

Hey!

Sure, please send me the services you'd like to add.

Can't use Craigslist at all, can I get some help

Edit: If unable to be fixed are refunds given?

MeetCriteria - June 25, 2017, 4:03 am

Update: OP was very calm and respectable even in my moment of feeling like it was another HF con, my apologies. OP has fixed my problem to my satisfaction and I appreciate it and recommend his support

TheSuspect - July 12, 2017, 9:22 am

Just tried this with Uber, every single number is already linked to an account....

EDIT: Got one that wasn't used but after going through the verification process it just kicks me out and doesn't seem to like the number

fjk23 - July 12, 2017, 6:12 pm

I just deposited some credits as I want to see this work for an important site. Ill let you guys know how it works and @TheSuspect, the number is not the problem, its uber's tight security/ban system. it not only recognizes emails, ip, number, cards, but also the hardware type, meid, you know it, it takes it down, so if you are not changing all that before signing up... good luck trying to get it to work and if you are in the USA, may god help you, cus thats 10X harder to do as even if you get passed it, you will need a valid payment method that WILL be precharged for any ride/order you try to do, not \$1, but the full amount and if the VCC doesnt have it, they WILL block the account. Maybe you have a way around all that, if you do, good luck Bruh :D

UPDATE: The btc payment confirmed and I went to my dashboard but the credits are not there (might need to wait a bit, not in a rush :P) Other than that, the site does have some bugs as every time I click a different button, it logs me out and asks to sign in again. I am not sure what is going on with it, but just wanted to let the owner know so they can take a look.

Update 2: nevermind, got the credit! gonna test now.

Update 3: The site that I need to verify is on there but obviously it did not work and is never gonna work because the number that it provides is Chinese and the site only takes USA number starting with +1 (not +861), if the owner knew that he would not have listed it there. I only deposited for that particular site, so idk what to do now. OP, please PM me. Thanks!

Hello everyone,

I'm currently working on adding other countries as we speak, and uploading changes partially, which is why you might notice some misbehavior off the website and numbers not working correctly. Please worry not, all users affected by this will be offered a small recompense for their gratitude and understanding.

I ask you to bare with me for the couple next hours, a day max till I fully implement the new countries.

Thanks a lot, love you guys!

unknownfame - July 17, 2017, 10:41 pm

I've went through your support and suggested a site. Really need that.

Susl1k - October 24, 2017, 7:01 pm

this service is not working, when i try to get a number, it says 'Not Authenticated!', i send email to support but didn't get any answer.

it seems I wasted my 5\$.

Problem solved

Is this reselling the GetSMSCode API? Chinese numbers sounds familiar..

Lambasoft - October 26, 2017, 4:01 am

The site is up and running smoothly. I have PMed those that had unfortuante problems, explaining what happened.

Thanks for understanding.
