Thread: [\[RELEASE\] WORDLIST MAKER / PASSWORD LIST MAKER \[EASY\] \[FREE\]](#)

Cenu - January 10, 2016, 10:36 am

Hey HF member,
for a while i've wrote my own wordlist maker.

SCREENSHOT:

[IMG]<http://fs5.directupload.net/images/160110/5i8kevlx.jpg>[/IMG]

WHAT IT MAKES:

Create a Wordlist with the word that you type in the field.

EXAMPLE:

[IMG]<http://fs5.directupload.net/images/160110/9df64nhj.jpg>[/IMG]

Then click on "BUILD WORDLIST"
and the wordlist.txt will appear in the folder with this content:

Code test

these are ~130 words based on your word.

NOTE:

- When i turn my AV System on, the program needs ~10 seconds to start because my AV check it everytime when i start it.

So don't wonder when it takes long time to start when u have your AV system on.

- When you have already a nice wordlist, just name it wordlist.txt and the programm will add the pw's into your wordlist.

VIRUS SCAN:

lol, there are two infects, but these are false positives!

Test it with sandboxie or whatever!

It's written in AutoIT, it's NOT a virus!

The decrypt error is fixed.

You should now be able to decode without errors.

I was just thinking that.

@OP

Would be cool to add a couple other options, like word combinations

IE - Enter in 1-2 words and combine various other series, or a word + series of numbers (maybe a range?)

THis would help with the common element I notice a lot of people tend to use and that is a name + year of birth or similar.

Also maybe a built in online dictionary and thesaurus option?

Yes, I also thought about this.

And im already on doing this, combo lists, range settings, year of brith options, different languages dictionary etc. but i don't now if I will release it for free.
