Thread: [How do I quickly submit messages on the Bluestacks Kik app?](#)

mvrccys - January 10, 2016, 7:43 pm

Usually I just go to the send message button and click it, but it would make my process a lot faster if I could use a key combination to do it. Does anyone know ?

Ctrl + C = Copy

Ctrl + V = Paste

Just copy and paste and you'll get a smooth rhythm...

That's usually for new chats though other than that it doesn't get any faster unless you use/buy a bot lol

Oh yeah I know, but how do I quickly send the message as opposed to clicking the send button?

Theres an option in kik chat settings. You can send using the "enter" button.
