Thread: [Am I alone in this section? Lets pick up the crypto currency board activity!](#)

Greetings Cryptofans and newbies!

We need some more activity in the crypto currency board...I feel like a spammer seeing my name in the "last post" section every time I'm online, I feel there is a lot of potential here though it seems not enough discussion is being made!!

Of course this is a newer section of HF since crypto currency did not become this popular until only recently, but it would be great if we can get more users on board to make some discussion and keep the board active.

How can we make more activity in this board?

1. Participate in the discussions created by topics and in topics
2. Create constructive crypto conversation topics
3. Ask questions, I and many others are always here to help you with your questions about crypto currency!
4. Ask questions
5. Ask questions

I could list "Ask questions" many more times, I can't express enough how important your questions are in this board! I and many others are ready to help you out and teach you about Cryptos, don't hesitate to ask by creating a topic or posting in the board. Who knows, you might even help someone else along the way!

Here's to more activity and hopefully more members names in the last post section so I'm not too alone ??

I can't help but feel it is ironic no one replied to your post haha, but I totally agree! It's a great, under appreciated section.

The hype has died down. Used to be alt coins coming out almost daily after what happened to Dogecoin not to mention the price of BTC over \$1,000.

Would be great to see this section more active, just not sure how you would go about doing it.

Tell me about it, had a laugh myself, but yet again proved my point

@Ben just no big news lately, hopefully some discussion arises

Not anymore, after the CE section is gone it's blown up about how to buy/sell bitcoins sadly.

Today just login and found out CE section gone.

It'll never be the same again.

Posting guides on how to trade in cex.io, coinbase, circle, bitstamp, btc-e/etc would be a nice.
