Can you redeem your gift cards via [purse.io](#) into CASH? Also, you say AGCs can be charged back. Can they still be charged back even AFTER you have claimed it?

Yes, use your account, but get the gift card in different e-mail(that is not associated with an amazon account)

Yes, they can be charged back after you redeem it, and this is more worse, because your account might get on hold.

Thank you for this!

I know it was talked about earlier in the post, but continuing it, should you even waste the time and charges to transfer the gift cards to bitcoin and then back into gift card's or paypal to "clean" it? Is there really any need to if you plan on using it basically instantly?

I think it's all about to don't keep a lot of money in Amazon account if Amazon will hold your account.

So u can spend your money instantly or exchange it to other currency.

That reasoning make more sense than to just exchange it to "clean" it. If you look around the forums you can see people lose their amazon accounts with hundreds even thousands of dollars.
