Thread: [Free online Crypter by Magic Mushroom \[only native\]](#)

**MagicMushroom** - January 15, 2016, 12:21 pm

Always remember this is a free service, dont cry if the result isnt always undetected.

Prevent this by not scanning on virustotal !

Today im releasing my free Crypter.

for now it only works on native files.(self injection)

Stub is written in autoit (raw stub = 500-600 kb)

Stub sleeps for 22 sec to bypass deepfreeze.

Thank you for this... Appreciate the work and effort it took.  
Works perfectly with Pony on machines running McAfee Enterprise.

I was taking the piss.  
Sarcasm doesn't go through well on the internet so it's kinda lost in translation with my comments  
FilePump for FUD is in no way a legit FUD method.

This post made me laugh quite a bit :)  
The sarcasm was quite clear!
