Thread: [Hide the real operating system.](#)

xpsycho01x - January 16, 2016, 1:28 am

Sometimes when I go on some website, then it recognize my operating system (linux).
Is there a way to hide my real operating system ?

Black?jack - January 16, 2016, 2:00 am

<https://addons.mozilla.org/en-US/firefox/addon/user-agent-switcher/>

<https://chrome.google.com/webstore/detail/user-agent-switcher-for-c/djflhoibgkdhkhcedjiklpkjnoahfmq>

Change your user agent to a Windows one.

You also need to disable Javascript, get noscript as well as doing what Blackjack suggested:
<https://noscript.net/>

If you're worried about Firefox leaking information you should also disable WebRTC.
In about:config change media.peerconnection.enabled to disabled.
